** The specifications in this catalog are subject to change without notification.

1.

Sizing of a **HIWIN** Linear Actuator

Step 1: Determine the load and speed

Consider the operating environment, compare the specifications of various types of Hiwin Linear Actuators and select the most appropriate model.

Step 2: Stroke and retracted length sizing

Consider the dimensions of the operating area and select the appropriate actuator.

Step 3: Duty cycle

Duty cycles should not exceed 10%. If the duty cycle exceeds 10%, the life of the actuator can be reduced. Users should make sure that no torsion or impact forces are acting upon the actuator.

Step 4: Controller sizing

The controller selection should be made according to the power requirements of the actuator. Other considerations include the number of axes, type of limit switches and the series of keypad.

2.

Installation of a **HIWIN** Linear Actuator

1. Please ensure that the extension tube is at the “lowest position”. The term “lowest position” refers to the position where there is no further movement towards the DC motor while the actuator is powered on.
2. The front and end joints of the linear actuator should be mounted onto two fixed positions on the main chassis. Locations of these fixed positions should be chosen according to the stroke length of the linear actuator.
3. After the fixed positions have been selected, install the fixtures onto these selected positions of the main chassis. These fixtures are used to fix the front and end joints of the linear actuator.
4. Assemble the front and end joints of the linear actuator onto the two fixtures using fixture bolts. Please ensure that the fixture bolts rotate freely when this step is completed. Also, please ensure that the fixture bolts do not become “loose” and fall off during operation.
5. The chassis of the linear actuator should be mounted in the horizontal direction if it is going to be operated in this direction and likewise for vertical operation. Damages could occur to the actuator if these instructions are not followed.
6. Make sure that:
 - The travel distance of the actuator matches the design requirements.
 - The upper and lower limit switches are functioning.
 - The motor stops when the extension tube reaches the upper and lower limit switches.

* If the actuator does not operate as described above, please repeat steps 2 thru 4 to make sure that the installation is correct.

** All **HIWIN** linear actuators and control boxes have to be grounded.

3.

Regulations to Safely Operate **HIWIN Linear Actuators**

1. A no-load operation may damage the actuator, especially if the actuator has external limit switches installed.
2. Please make sure that the actuators are not installed where the motor or any mechanical parts can be damaged due to dangerous environments.
3. Make sure the DC voltage supplied to the actuator matches the specifications on the actuator. The power supply should supply enough power under maximum load.
4. Under extreme load situations, the motor will try to draw more than the rated current. It is the operator's duty to ensure that the power supply does not provide more current than specified on the actuator. Excessive current will cause wiring damage and possible failure of the actuator. Unless otherwise specified, our actuators have a duty cycle rating of 10%. The duty cycle is defined as two minutes of continuous operation, followed by 18 minutes of non-operation. If the duty cycle exceeds 10%, please consider over-current protection measures. Install protection devices such as fuses or an over-current detection between the power supply and the actuator input end. Detection signals are to be used for operation interruption or shut down.
5. Thermal protection is included on some Hiwin linear actuator models. This will shut down the motor when over-heated.
6. If the actuator was purchased without limit switches, please install appropriate limit switches that comply with the power supply and over-current protection devices that are used.
7. The actuator's motors are DC driven. When the motor is not in operation, please short the ends of the power input to provide additional locking power. Make sure the controller power is shut off prior to shorting the motor inputs. The movement of the extension tube can be reversed by changing the polarity of the voltage supplied.
8. Make sure the actuator operates within its stroke length if it is not supplied with limit switches or an over load protection device.
9. The actuator should operate within the rated load specifications.
10. Please make sure the actuator is operating within the IP rating for dust and water.
11. For applications requiring high accuracy and tight speed requirements, please inquire about Hiwin's KK-series linear stages.
12. Electrical self locking should be implemented if the Hiwin controller is not being used. This will increase the actuator's locking force.

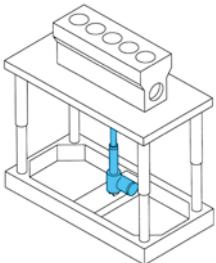

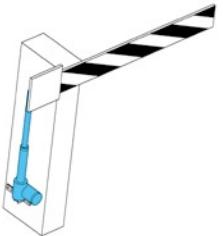

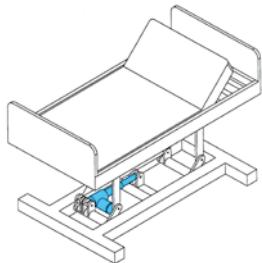

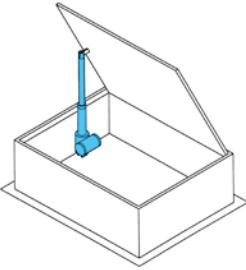

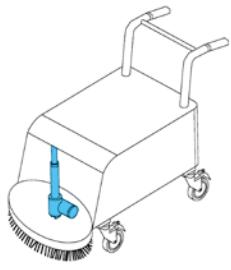

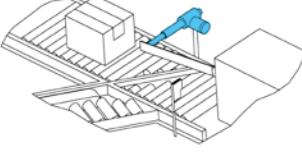

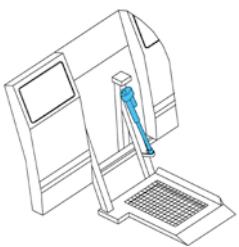

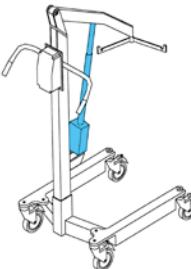

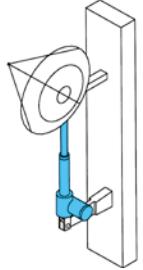

4.

Features & Applications

4-1 Features of a Linear Actuator

- | | |
|---------------------------------------|----------------------|
| 1. Light weight and compact structure | 4. Low noise |

* Stroke length 200mm

* Option: (1) Hall Sensor

(3) Mechanical Spline (push only)

(5) IP65; IP66

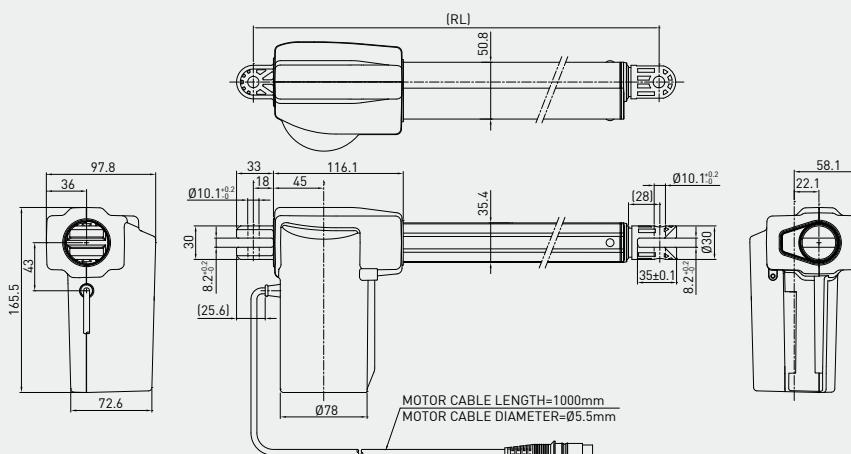

(7) Quick release (For LAN5-3, LAN5-4 only)

(2) Safety nut

(4) Back fixture turned 0°, 45°, 90°, 135°

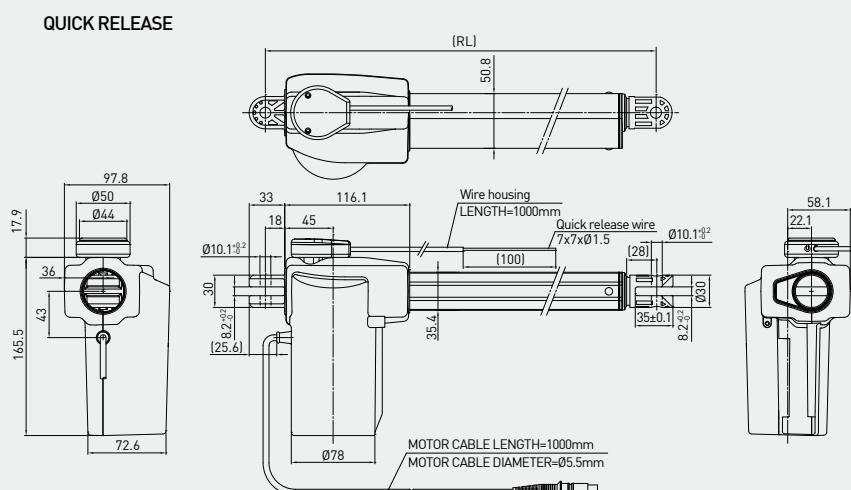

(6) Back fixture and rodeye hole Ø12.1mm

(8) UL version

- RL=S+163
Stroke≤300
- RL=S+213
Stroke>300

RL:Retracted length
S:Stroke length

Quick release function:

- (1) The quick release cable can be pulled while the load on actuator under 100N.
- (2) When the quick release is activated, the actuator must have a load over 700N to ensure the actuator runs inwards.
- (3) After quick release activated, it may be necessary to run the actuator inwards.

HIWIN LAC3 Series**LAC3****CE**

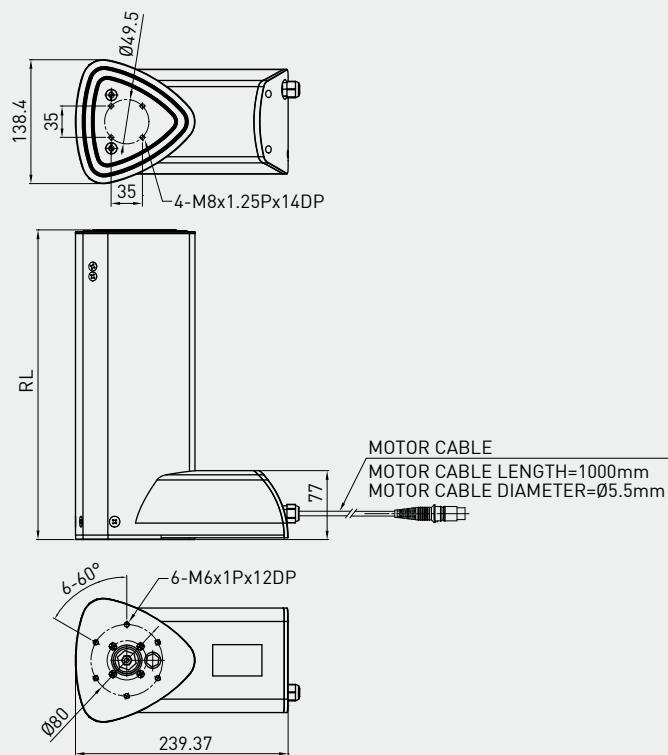

| | |
|-----------------------|---------------------------------------------------------------------------------------|
| Screw type | ACME |
| Weight* | 8.1kg |
| Protection | IP54 |
| Compatible controller | Compatible with all controllers (*Notice the type of connector: Audio/DIN 4pin) |
| Working temp. | +5°C~40°C |

* Stroke length 400mm

* Option: Position Feedback; Potentiometer; Hall sensor

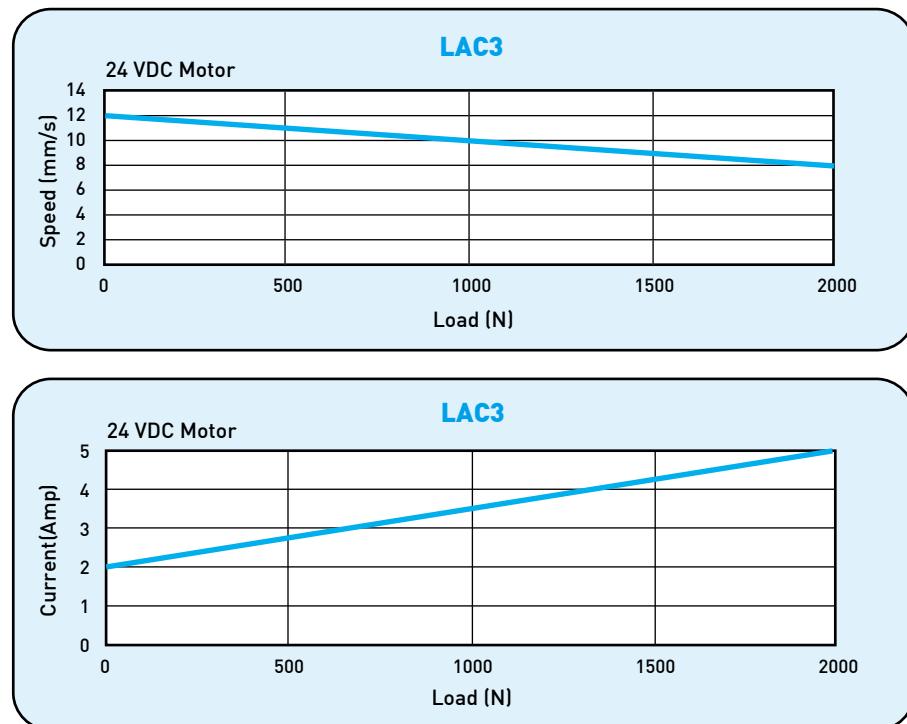

- RL=171+S/2
- RL:Retracted length
- S:Stroke length

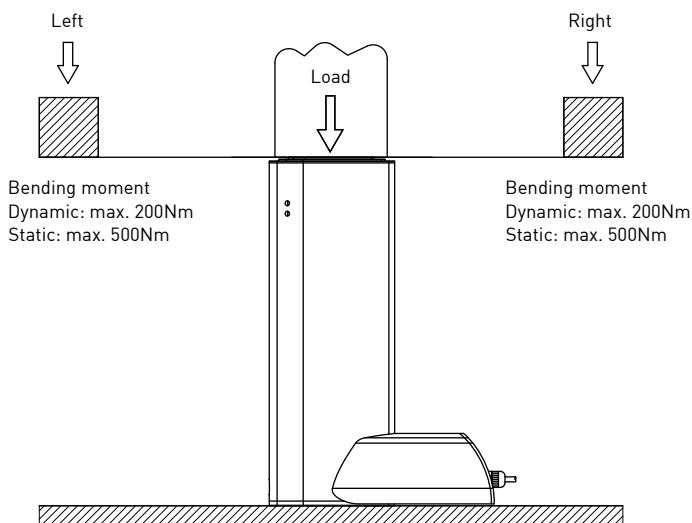

• LAC3 Specifications

| Model | Thrust max. (N) | Pulling max. (N) | Holding max. (N) | Speed (mm/s) Load=Max./Load=0 | | Standard stroke (mm) : S | | | Duty cycle % | Current max. (A) 24VDC | Potentiometer Resolution (ohm/mm) | Hall Sensor Resolution (mm/pulse) |
|--------|-----------------|------------------|------------------|----------------------------------|----|--------------------------|-----|-----|--------------|------------------------|-----------------------------------|-----------------------------------|
| LAC3-1 | 2000 | 500 | 2000 | 8 | 12 | 300 | 400 | 500 | 10 | 5 | 6.67 | 1.0 |

**Note: The test results are obtained by using the 24VDC power supply.

HIWIN 1-Axis Controller

LAK2LR

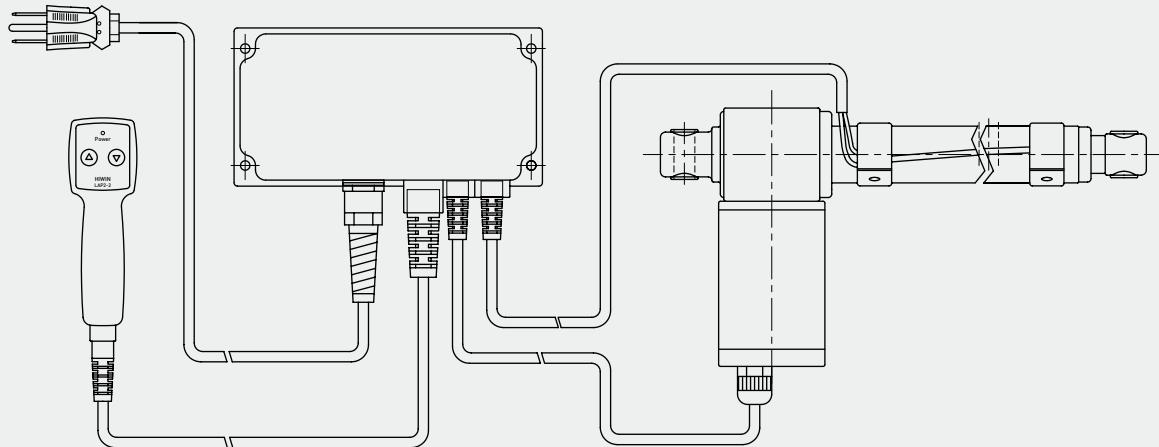

| | |
|---------------|---------------------|
| Input voltage | AC 100/110/220/230V |
| Output power | 108VA(24VDC)max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

* Option: IP66

• Features of the LAK2LR

- Controls 1 linear Actuator
- Controls 1 Actuator with external limit switches
- OLP (Over Load Protection)
- Standard cable length: 4M
- Electronic protection for the relays

- For Series LAM, LAN2 completed with external limit switches

- Ordering Information

LAK2LR - G - 110 - B E

| | | |
|--|--------------------------------------------------|------------------------------------------------------|
| | Special models according to Client's requirement | None E=Special requirement |
| | Color | B: Black G: Gray |

| | Actuator No. 1 | G: LAM-1/-2/-1A; LAN2 |

* Check attached table for over current setting...see page 53.

* The keypad of the LAK2LR is not the same as LAK2L.

11.

HIWIN 2-Axis Controller

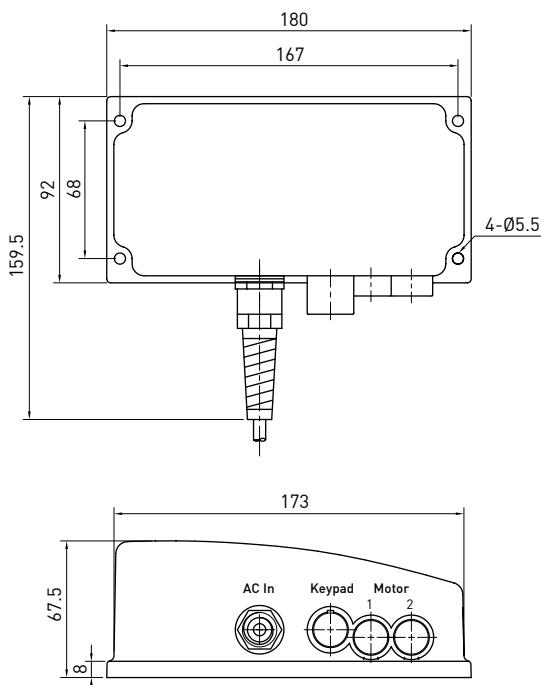

LAK2

CE

| | |
|----------------------|---------------------|
| Input voltage | AC 100/110/220/230V |
| Output power | 108VA(24VDC)max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

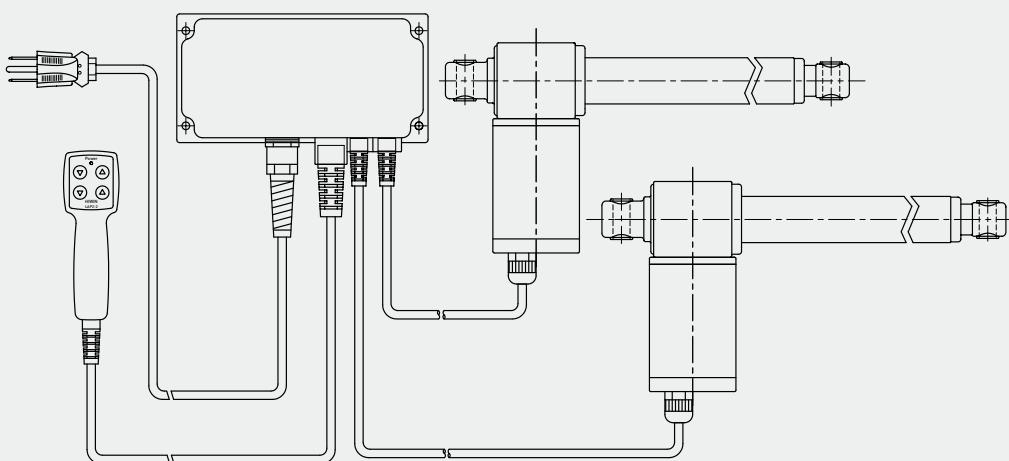

* Option: (1) IP66
 (2) DC 12V In & Out
 (3) DC 24V In & Out

• Features of LAK2

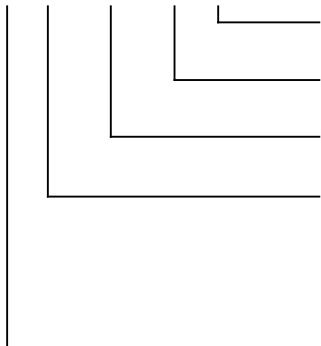

- Control 1 or 2 Linear Actuators
- Over load protection
- Standard cable length: AC:4M/DC:1M
- Electronic protection of the relays

• For Series LAS, LAS3, LAS4, LAM, LAN1, LAN2

• Ordering Information

11.**HIWIN 2-Axis Controller****LAK2BN**

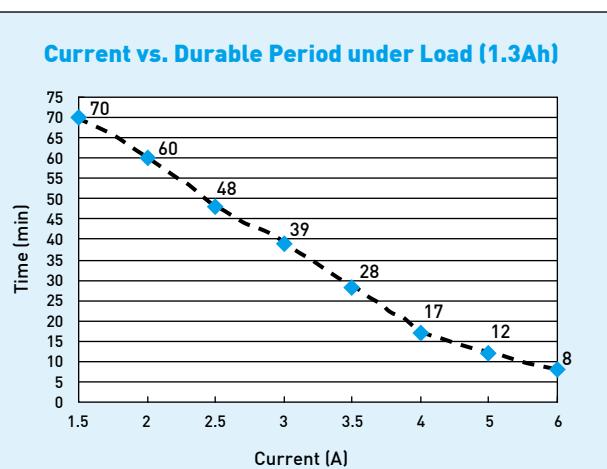

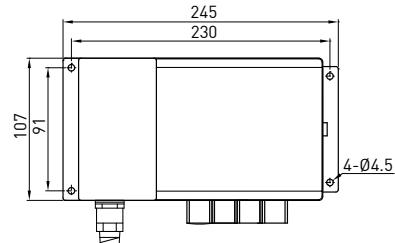

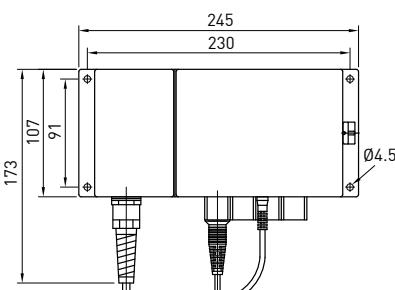

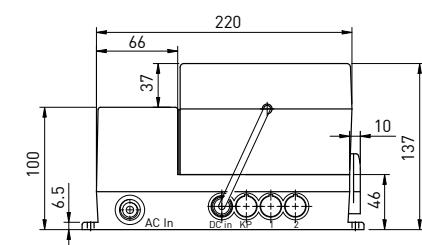

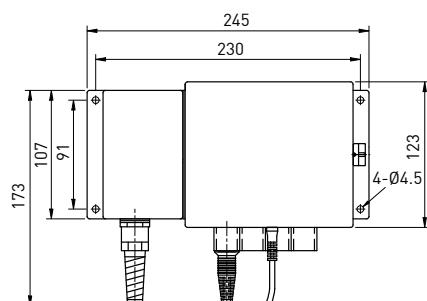

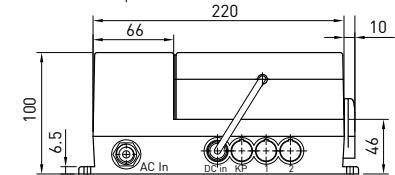

| | |
|---------------|---------------------|
| Input voltage | AC 100/110/220/230V |
| Output power | 144VA(24VDC)max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

* Option: (1) IP66
 (2) Custom program
 (3) Two axes move simultaneously
 (4) Two axes move synchronously (Actuators must have feedback)

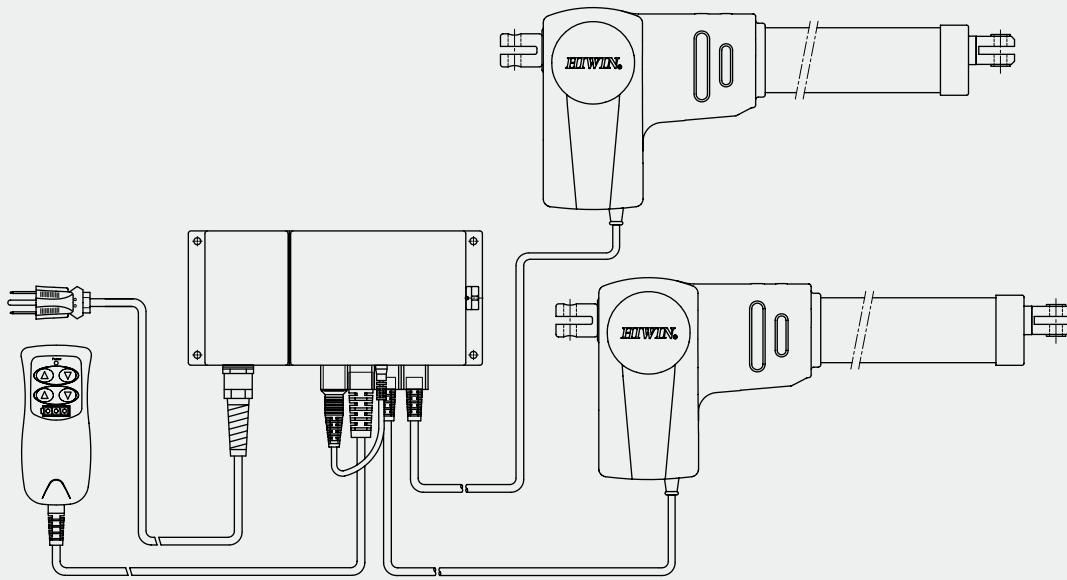

• Features of LAK2BN

- Control 1 or 2 Linear Actuators
- Compact size
- Over load protection
- Soft - start / stop
- Standard cable length: 4M
- Rechargeable Battery
- Low battery indicator (alarm)
- Battery capacity: 1.3Ah (12VDCx2)
 (Option: 2.9Ah, 12VDCx2)

***Note:** Please charge battery for at least 8 hours before initial use.

**0 No Battery box****1 For 1.3Ah Battery****2 For 2.9Ah Battery**

- For Series LAS4, LAN1 and LAM3

11.

HIWIN 2-Axis Controller

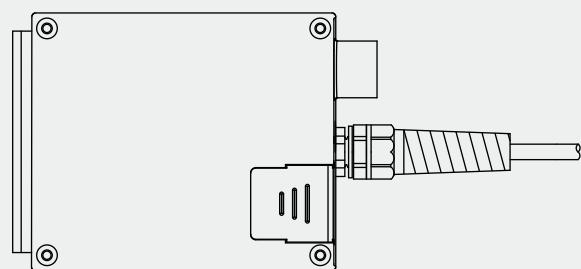

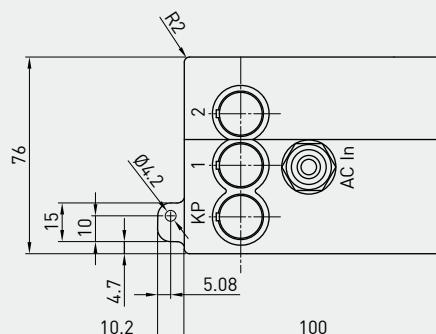

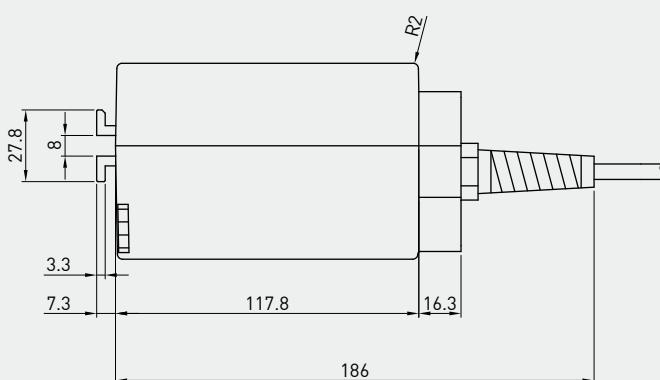

LAK2D

CE

| | |
|---------------|----------------------------------|
| Input voltage | AC 100/110/220/ 230V(50/60Hz) |
| Output power | 108VA(24VDC)max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

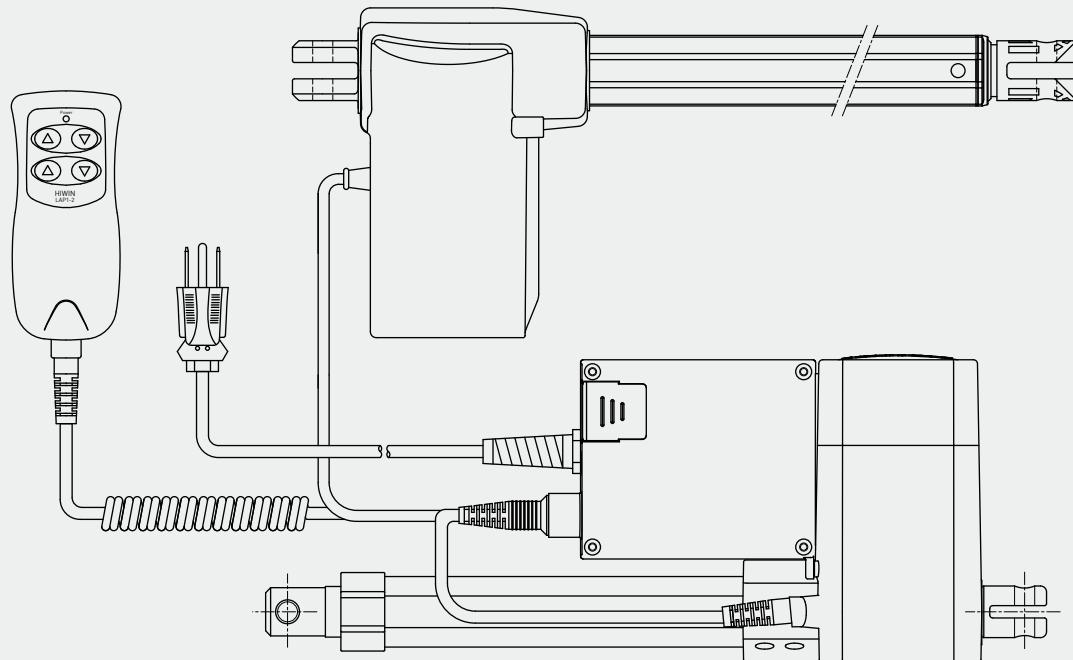

* Option: IP66

• Features of LAK2D

- Control 1 or 2 Linear Actuators
- Standard cable length: 4M
- Over load protection
- During an emergency power loss, please insert 2-9V alkaline batteries to lower the actuators. (Protection class is IP54 when LAK2D is operated with batteries)
- Can be mounted directly on the LAM3 or LAN5
- * There is no battery charge function, the 9V batteries are used for emergencies only.

• For Series LAS, LAS3, LAS4, LAM3, LAN1, LAN5, only the LAM3 and LAN5 can mounted directly onto the LAK2D

• Ordering Information

* Check attached table for over current setting...see page 53.

* LAK2D over current must be set to the same value.

11.

HIWIN 2-Axis Controller

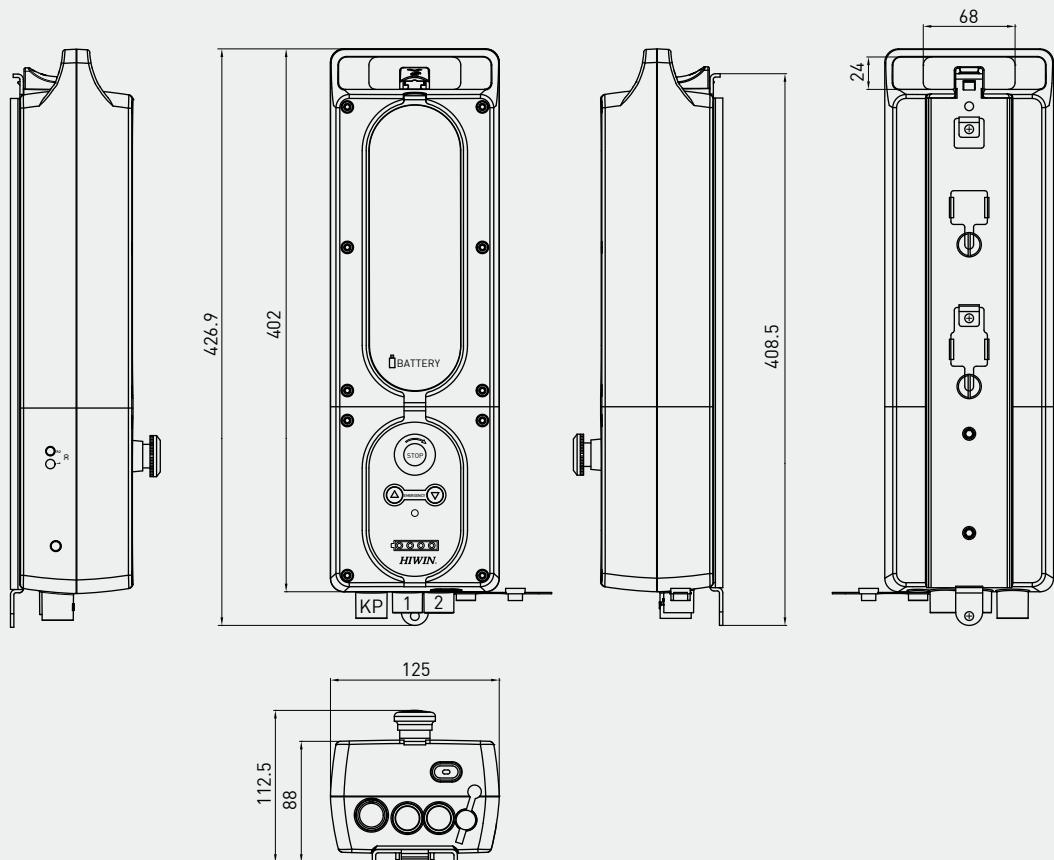

LAK2J

CE

| | |
|---------------|-----------|
| Output power | DC 24V |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

* Option: (1) IP65
(2) Custom program

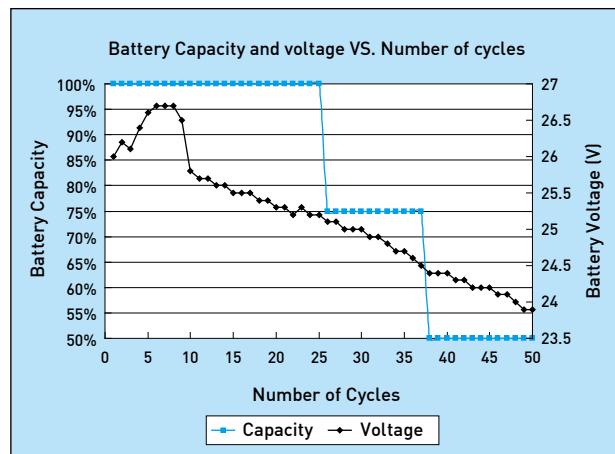

• Features of LAK2J

- Portable design (operated by battery)
- Control 1 to 2 Linear Actuators
- Emergency stop button
- Emergency operation through front panel (only for axis 1)
- Over load protection
- Soft - start / stop
- Battery rechargeable via LAKCH charger
- Automatic alarm when the battery is low
- Automatic Energy Saving Mode
- Battery capacity 4.5Ah (12VDC*2)
- LED for power indication

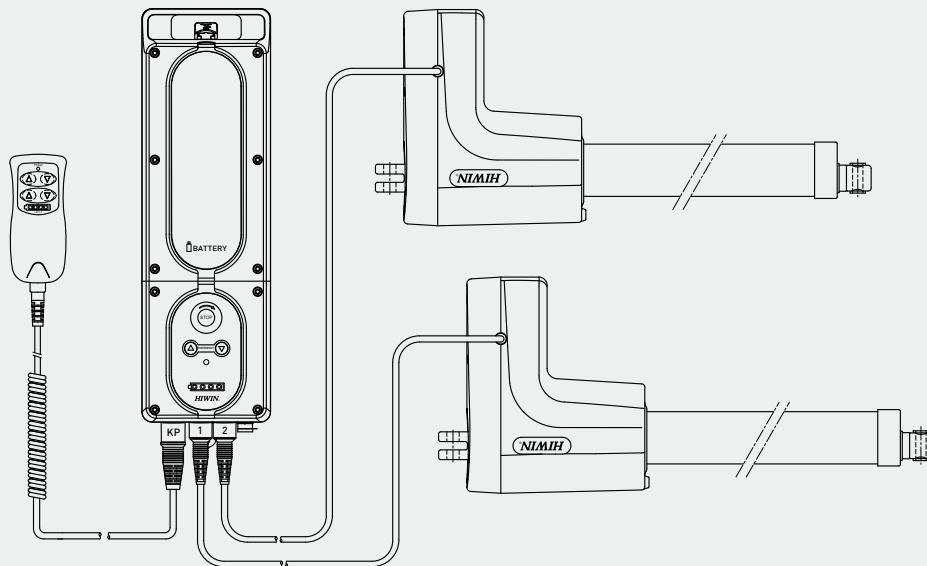

*Note: Please charge the battery for at least 12 hours before the initial use

• Battery Characteristics

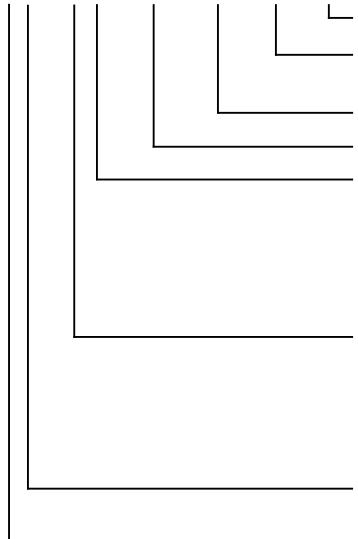

*Test results are obtained under 5A load current

• For series LAN3 and LAN1

HIWIN 4-Axis Controller (1)

LAK4D

| | |
|---------------|-------------------------|
| Input voltage | AC 100/110/120/220/230V |
| Output power | 72.5VA(24VDC)Max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

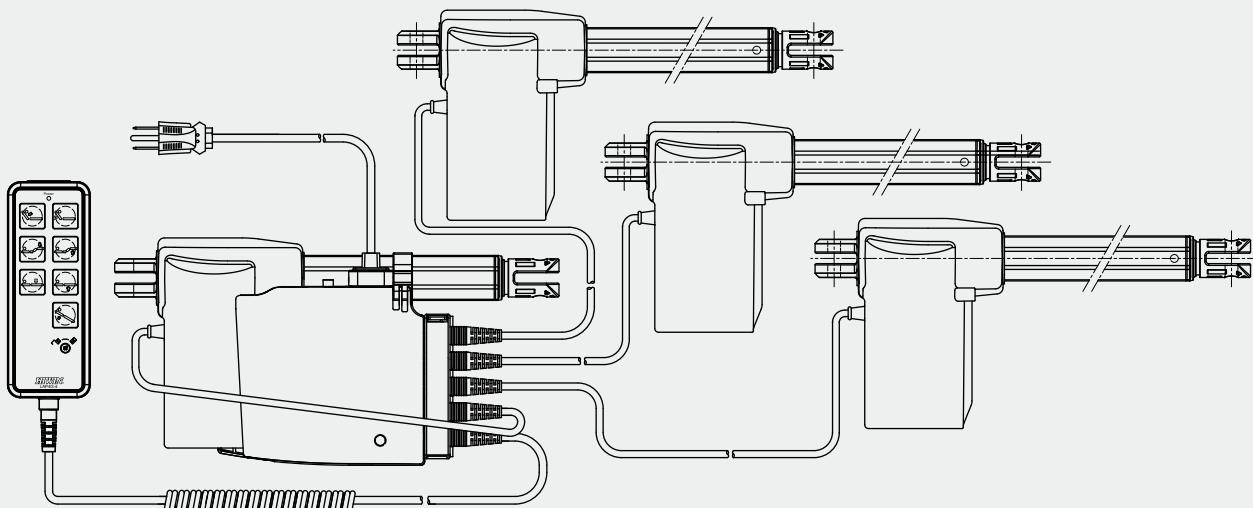

* Option: (1) IP66
(2) Output power: 144VA, 216VA
(3) UL Version

• Features of the LAK4D

- Control 1 to 4 Linear Actuator
- Standard cable length: 4M
- Detachable cable retainer (protection against accidental unplugging)
- Removable AC power cable.
- External ground and LED power display.
- Can be mounted directly on the LAN5. (LAN5 min. RL must be greater than 300mm)

• For Series LAN1, LAN5, LAM3, only the LAN5 can mounted directly on LAK4D.

• Ordering Information

HIWIN 4-Axis Controller (2)

LAK4N**CE**

| | |
|---------------|---------------------|
| Input voltage | AC 100/110/220/230V |
| Output power | 216VA[DC 24V]Max |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

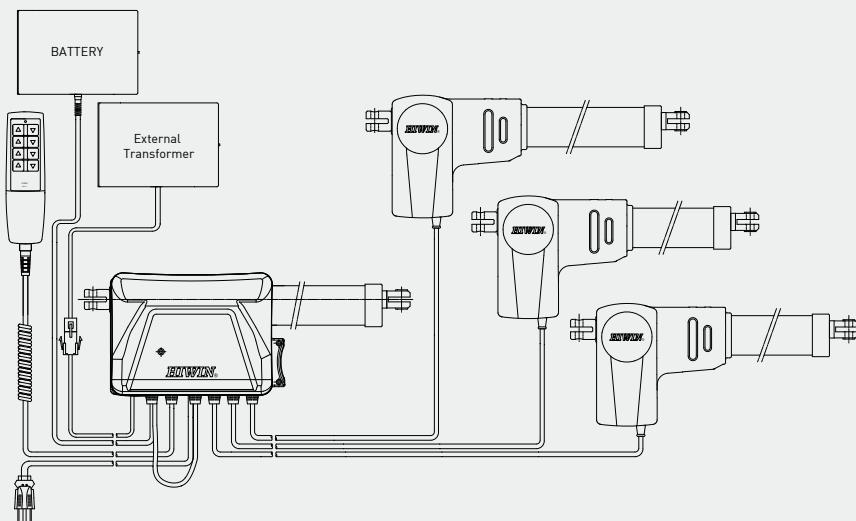

- * Option: (1) IP66
(2) Custom program
(3) Two axes move simultaneously
(4) Two axes move synchronously (Actuators must have feedback)

• Features of LAK4N

- Control 1 to 4 Linear Actuators
- Standard cable length: 4M
- Detachable cable retainer for accidental unplugging protection
- LED for power indication
- External DC input (LAKB-1/-2)
- Reconfigurable simultaneous movement
- Microprocessor (Software version) can receive the signal of hall sensor, optical sensor or potentiometer
- * Note: Simultaneous or Synchronous movement is not available for the LAN3-1/-2/-3(24Q)
- Over Load protection
- Removable AC power cable
- Soft - start / stop
- External battery input
- Can be mounted directly on LAN1

• For Series LAN1, LAM, LAM3, LAN3 and LAN5, only LAN1 can be mounted directly on LAK4N.

HIWIN Over Current Protection Box

LAKC-1

| | |
|-----------------------|-----------|
| Input voltage | 12/24VDC |
| Output voltage | 12/24VDC |
| Duty cycle | 10% |
| Working temp. | +5°C~40°C |
| Protection* | IP54 |

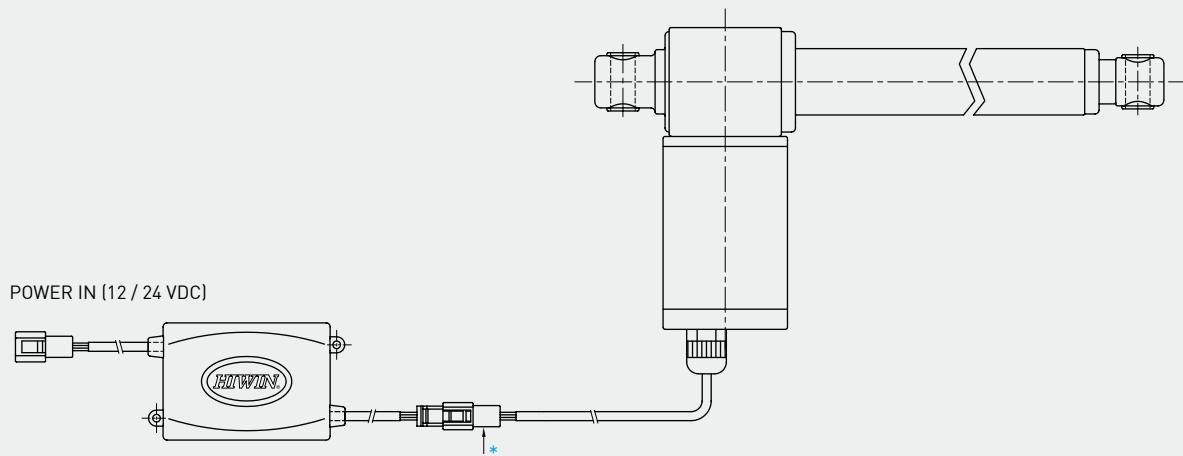

* Option: IP66

• Features of LAKC-1

- Compact size
- Low cost
- Easy to use
- Multiple over- current settings available
- Fast response time

• For Series

* When purchasing an actuator to be connected with the LAKC, please inform the Hiwin sales representative.

HIWIN Keypad Series

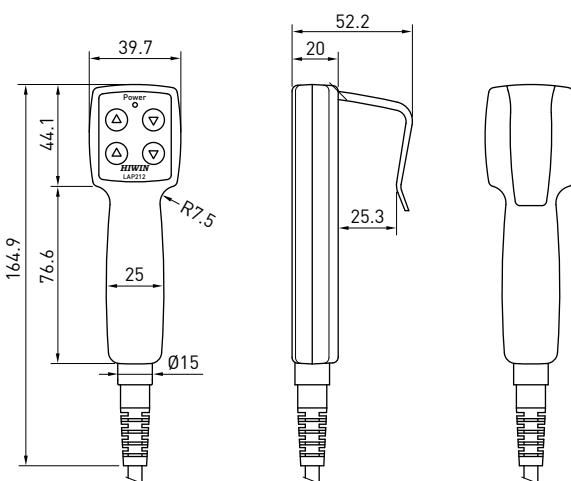

LAP1

• Features of the LAP1

- Controls a maximum of 2 Actuators
- Compatible with the LAK2, LAK4, LAK4D, LAK4N, LAK2LR, & the LAK2D
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- Protection: IP66

LAP2

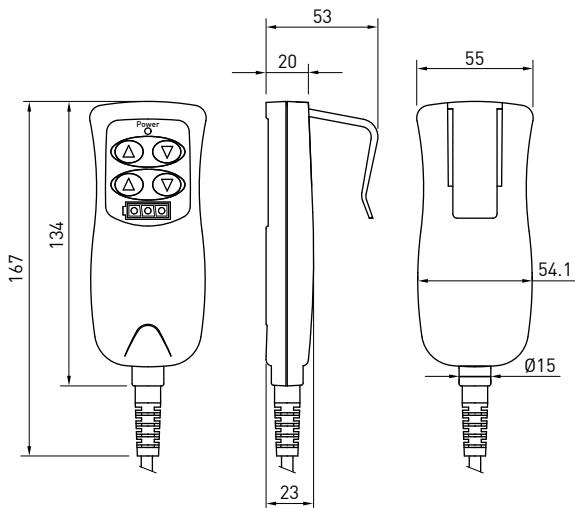

• Features of the LAP2

- Control maximum of 2 Actuators
- Compatible with LAK2, LAK4, LAK2D
- Ergonomic design and small size
- Standard cable length: coil 600mm; total 1100mm
- Protection: IP66

LAP3

c us

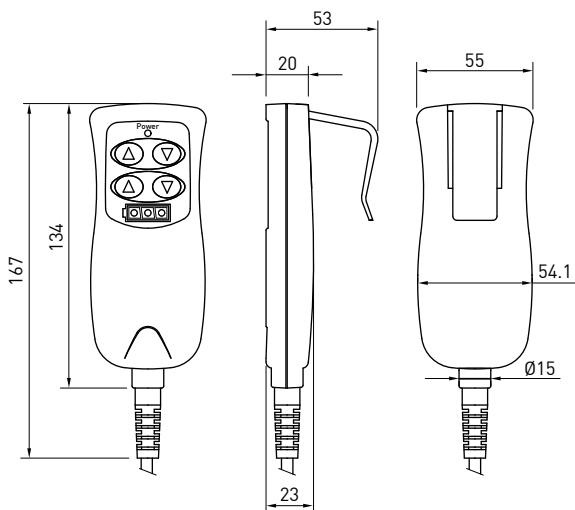

• Features of the LAP3

- Control maximum of 2 Actuators
- Compatible with LAK2B, LAK2J
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- LED for battery capacity
- Protection: IP66

* Option: UL version only for LAP3-1-B

LAP3N

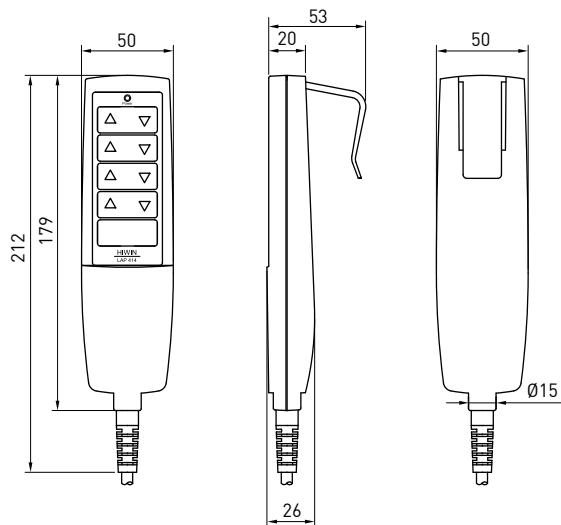

• Features of the LAP3N

- Control maximum of 2 Actuators
- Compatible with LAK2BN
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- LED for battery capacity
- Protection: IP66

LAP4

cRUS

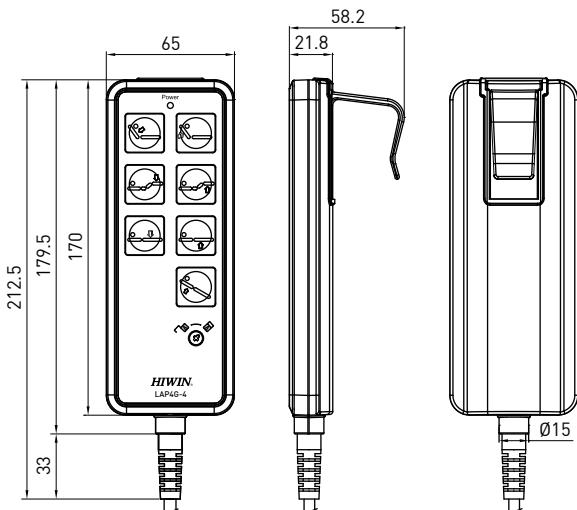

• Features of the LAP4

- Control maximum of 4 Actuators
 - Compatible with LAK4
 - Ergonomic design
 - Standard cable length: coil 600mm; total 1100mm
 - Protection: IP66
 - UL version only for LAP4-3-B
- * Option: (1) Cable length: coil 600mm; total 2250mm
 (2) UL version only for LAP4-3-B

LAP4G

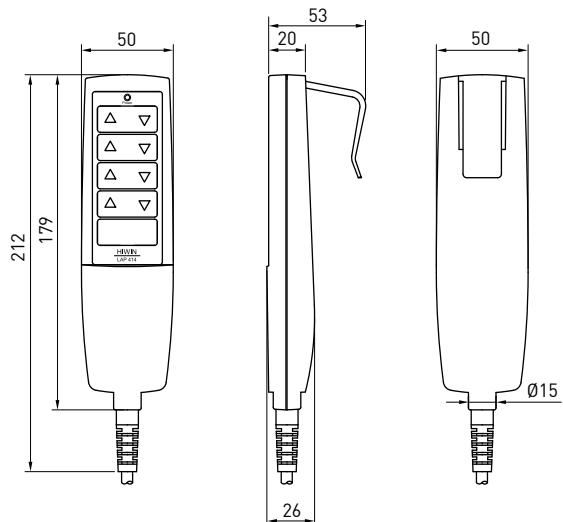

cRUS

• Features of the LAP4G

- Control maximum of 4 Actuators
 - Compatible with LAK4D, LAK4N, LAK6B
 - Ergonomic design
 - Standard cable length : coil 600mm; total 1100mm
 - Protection: IP66
 - With lock function
- * Option: (1) UL version
 (2) Cable length:coil 600mm; total 2250mm

LAP4N

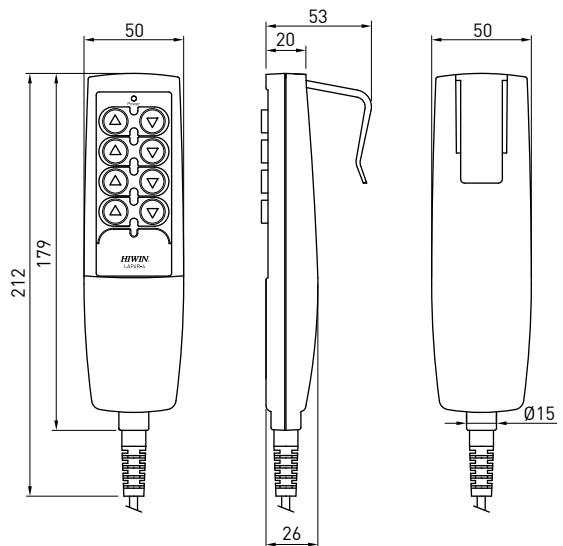

• Features of the LAP4N

- Control maximum of 4 Actuators
- Compatible with LAK4N, LAK4D
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- Protection: IP66

* Option: Cable length: Coil 600mm; total 2250mm

LAP4R

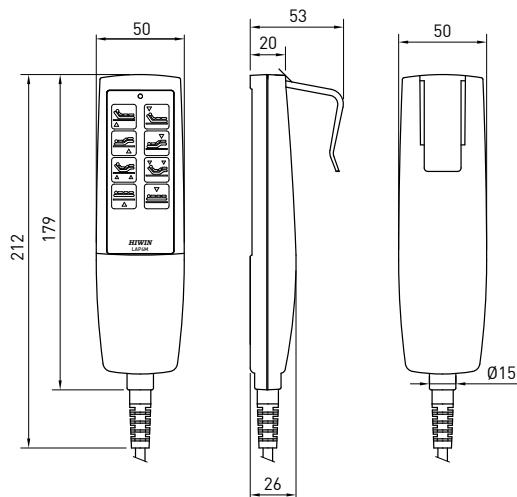

• Features of the LAP4R

- Control maximum of 4 Actuators
- Compatible with LAK4, LAK4D, LAK4N, LAK2J, LAK6B
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- Protection: IP66

* Option: Cable length: coil 600mm; total 2250mm

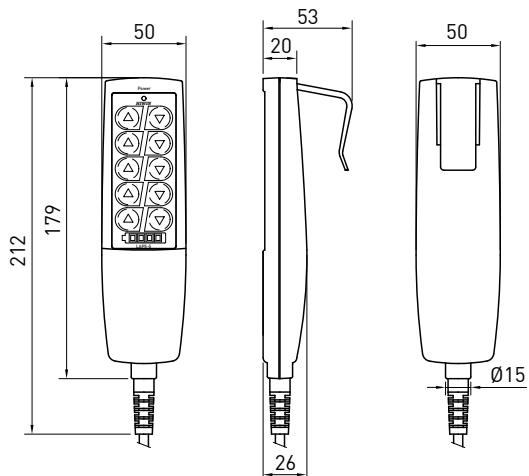

LAP4M

• Features of the LAP4M

- Control maximum of 4 Actuators
 - Compatible with LAK4, LAK4D, LAK4N
 - Ergonomic design
 - Standard cable length: coil 600mm; total 1100mm
 - Protection: IP66
- * Option: Cable length: coil 600mm; total 2250mm

LAP5

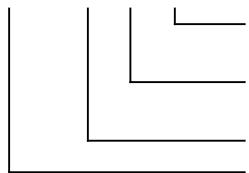

• Features of the LAP5

- Control maximum of 5 Actuators
- Compatible with LAK6B, LAK2J
- Ergonomic design
- Standard cable length: coil 600mm; total 1100mm
- Protection: IP66
