TwisterChain®

# Energy Chain System®

## Triflex® R Series

### Energy Chains® for robotics applications

The igus® Triflex® R system is the first choice for multiaxis-robots. Three versions are available: TRC: Closed design, TRE: "E-Z" design, easy to fill from outside, TRL: The "light" version of the "E-Z" design. It is universal for reliable energy supply, in general machinery with multi-axis 3D movements

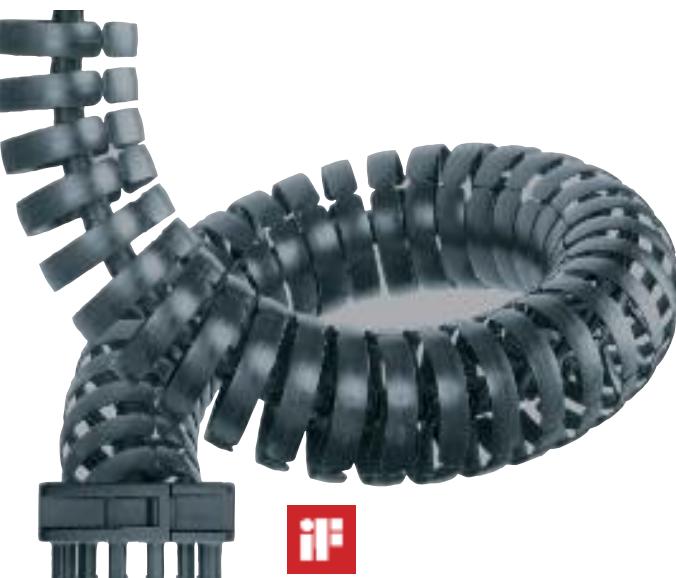

#### TRC- closed design

- Energy supply for multi-axis 3D-movements
  - High torsional stability
  - Easy shortening and lengthening
  - Small bend radius
  - High tensile force capacity
  - If a smooth and robust exterior is needed
- See page 8.13

#### TRE- "E-Z" design

- Cables are easy to install and replace
  - Energy supply for multi-axis 3D-movements
  - High torsional stability
  - Easy shortening and lengthening
  - Small bend radius
  - High tensile force capacity
- See page 8.15

#### TRL- light design

- If a light weight, cost-efficient and easy to fill 3D Energy Chain® is necessary
  - If a 3D Energy Chain® for easy 3D-movements is needed
  - If an easy to use 3D Energy Chain® is needed
  - If a 3D Energy Chain® for nonrobotic-applications is needed
- See page 8.17

# Energy Chain System®

## Triflex® Series

### Energy Chains® for robotics applications

The Triflex® series was developed to realize safe energy supply in the case of multi-dimensional movements. In doing so the flexibility of a hose was combined with the stability of an Energy Chain® and its defined radii. 2 versions are available: Easy to fill **E-Z Triflex®** and the closed **Triflex®**.

#### Simple filling - E-Z Triflex®

- If easy filling and complex movements are necessary
- Very fast cable assembly with "E-Z" principle
- Simple filling from two sides
- For reparations or supplements of existing Triflex® Systems
- For simple 3D-applications

► See page 8.31

#### Closed version Triflex®

- For applications with one, two or three directions of motion (combined circle- and stroke-movements)
- Completely enclosed - protection against dirt and chips

► See page 8.43

#### Rotary motion with TwisterChain®

The TwisterChain® product line offers the biggest selection for rotary movements. TwisterChain® solutions are available with Guide Troughs:

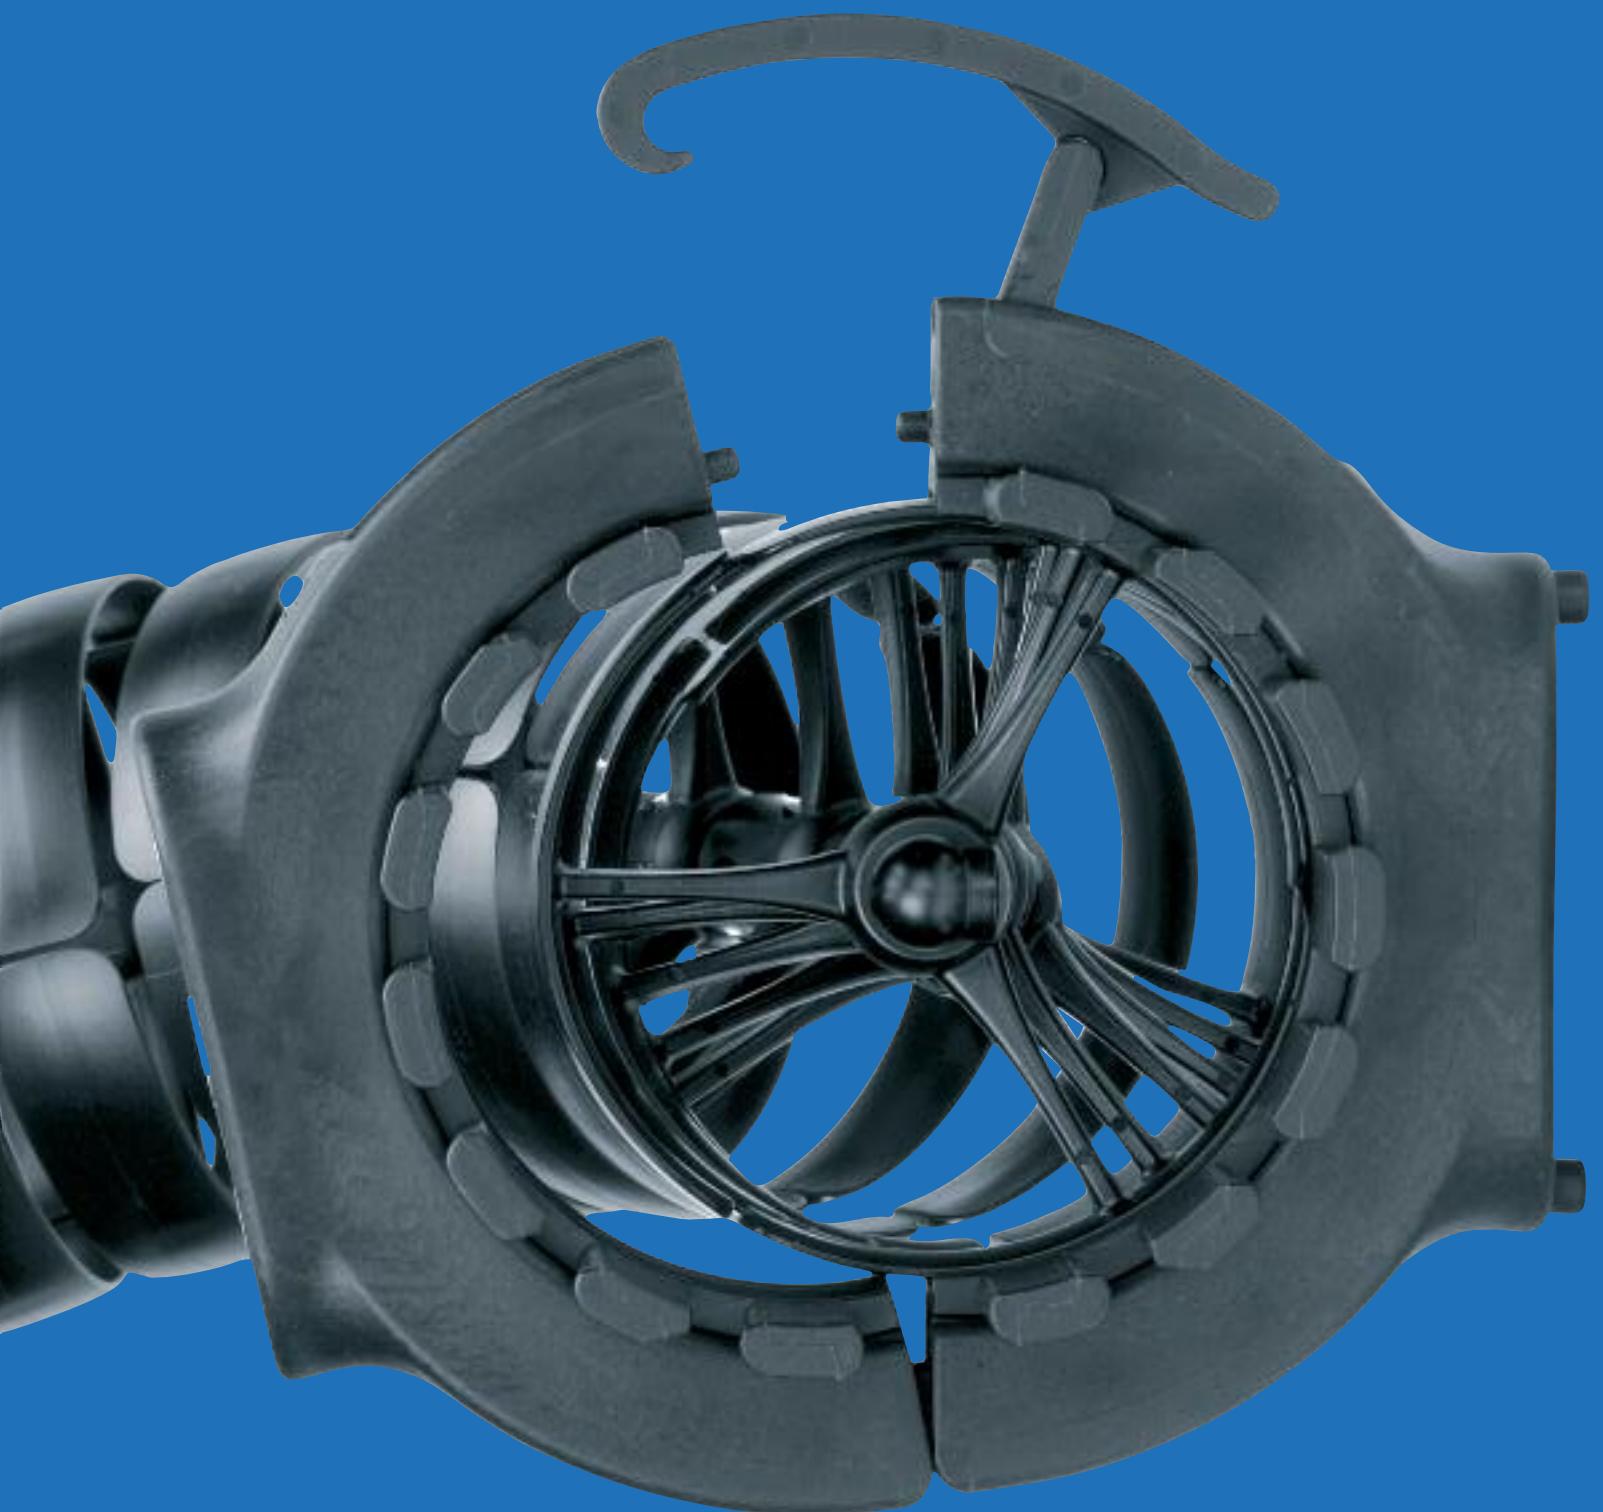

#### TwisterChain®

- Modular interior separation
- Crossbars can be opened on both sides
- At rotating speeds up to 90°/s
- igus® TwisterChain® for circular motions up to 540° (with special attachments)

► See page 8.57

Triflex® R

# Triflex® R - 3-dimensional Energy Chains® for robots

Triflex® R is the third generation of multi-axis Energy Chains®. Design features include:

- Optional fiber rod for spring loading of the Triflex® R
- Approximately  $\pm 10^\circ$  twist per chain link
- High tensile strength of the ball-and-socket joint
- Easy assembly and modification due to single molded link design. No support elements (steel cables, spring suspensions etc.) are necessary

The Triflex® R product family now comprises more than 100 components meeting all requirements ranging from those of small palleting robots to large welding robots.

## Typical industries and applications

- Robotics/Automation
- Machine tools
- Handling machines - 6-axis
- Packaging machines
- General mechanical engineering, etc.

IF-Design awards for  
TRC and TRL-design

Series TRC - Electrically conductive  
ESD/ATEX version upon request

Cleanroom suitability

UL94-V2  
classification

### Triflex® RS - universal module for all motions on a robot

Triflex® RS is a very compact universal assembly that is mounted to installation points available on the robot. Thanks to the low profile and the Triflex® R cable carrier parallel to the robotic arm, applications with extremely low installation space can be achieved.

Fiber-rod module for directed pretension and universal assembly kit for multifaceted adjustments

Triflex® R Set - Routed closely on the robotic arm for extreme flatness

# Energy Chain System®

## Series Triflex® R

### Selection Guide

TRC Version - closed design

TRE Version - "E-Z" design - simply press cables in

TRL Version - 3-chamber system - the "light" version of the "E-Z" design simply press cables in

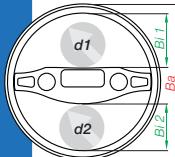

#### Select this system for:

- The first choice for multi-axis-robots
- **Three versions are available:** TRC: Closed design, TRE: "E-Z" design, easy to fill from outside, TRL: The "light" version of the "E-Z" design
- Universal for general machinery
- Multi-axis (3D) movement
- High torsional stability
- Easy shortening and lengthening
- Smooth interior and exterior edges (TRC)
- Small bend radius
- ① Ball-and-② socket principle
- Cables easy to assemble and to replace (TRE/TRL-version)
- Triflex® R-Set - compact module for all movements on robots, which can be fixed on existing fastening points
- TRL - one piece, very lightweight
- High tensile strengths without additional elements like steel cable and spring elements etc
- You can find more technical data about the material, chemical resistance, temperatures ➤ Design, Chapter 1

#### Selection table

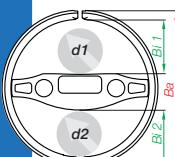

Series	Inner height		max. cable ø		Outer width <i>Ba</i>	Bending radii <i>R</i>	Pitch
	<i>Bi 1</i> in. (mm)	<i>Bi 2</i> in. (mm)	<i>d1</i> in. (mm)	<i>d2</i> in. (mm)			

#### "TRC" - Triflex® R closed design, dirt-resistant

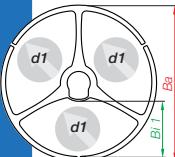

TRC-30	.47 (12)	.39 (10)	.39 (10)	.31 (8)	1.36 (34.5)	1.97 (50)	.44 (11.3)

TRC-100	1.48 (37.5)	1.28 (32.5)	1.40 (35.5)	1.20 (30.5)	4.25 (108)	5.71 (145)	1.36 (34.5)
TRC-125**	1.70 (43.3)	1.70 (43.3)	1.61 (41)	1.61 (41)	5.31 (135)	7.17 (182)	1.76 (44.6)

#### "TRE" - Triflex® R "E-Z" design for fast installation of cables

TRE-30	.47 (12)	.39 (10)	.39 (10*)	.31 (8*)	1.36 (34.5)	1.97 (50)	.44 (11.3)
TRE-40	.59 (15)	.51 (13)	.51 (13*)	.43 (11*)	1.69 (43)	2.28 (58)	.55 (13.9)
TRE-60	.88 (22.5)	.77 (19.5)	.81 (20.5*)	.69 (17.5*)	2.56 (65)	3.43 (87)	.80 (20.4)
TRE-70	1.10 (28)	.94 (24)	1.02 (26*)	.87 (22*)	3.19 (81)	4.33 (110)	1.01 (25.6)
TRE-85	1.30 (33)	1.10 (28)	1.22 (31*)	1.02 (26*)	3.72 (94.5)	5.31 (135)	1.20 (30.6)
TRE-100	1.48 (37.5)	1.28 (32.5)	1.40 (35.5*)	1.20 (30.5*)	4.25 (108)	5.71 (145)	1.36 (34.5)
TRE-125**	1.70 (43.3)	1.70 (43.3)	1.61 (41*)	1.61 (41*)	5.31 (135)	7.17 (182)	1.76 (44.6)

#### "TRL" - a light and economical alternative with an "E-Z" design

TRL-30	.47 (12)	.39 (10)	.39 (10*)	.31 (8*)	1.36 (34.5)	1.97 (50)	.44 (11.3)
TRL-40	.59 (15)	—	.51 (13*)	—	1.69 (43)	2.28 (58)	.55 (13.9)
TRL-60	.91 (23)	—	.81 (20.5*)	—	2.56 (65)	3.43 (87)	.80 (20.4)
TRL-70	1.10 (28)	—	1.02 (26*)	—	3.19 (81)	4.33 (110)	1.01 (25.6)
TRL-100	1.50 (38)	—	1.40 (35.5*)	—	4.25 (108)	5.31 (145)	1.36 (34.5)

\* For quick and easy insertion / removal of cables using the E-Z Chain® principle, we recommend a maximum cable diameter of 70% of the specified value.

\*\* If shortening/lengthening of a "filled" Triflex® TRC/TRE-125 is required, cable diameter changes to Ø 1.42" (36 mm).

# Energy Chain System®

## Series Triflex® R

### Assembly Instructions - TRC Series

#### Assembly | TRC-30 · TRC-40 · TRC-60 · TRC-70 · TRC-85 · TRC-100

Hold two pieces together at inner radius and move socket up against the ball s wedged end

#### Separating | TRC-30 · TRC-40 · TRC-60

Bend Triflex® R into its radius and twist apart, counter-clockwise

#### Separating | TRC-70 · TRC-85 · TRC-100

Insert screwdriver into the opening of the socket from the top. Then twist apart, counter-clockwise

#### Assembly | Separating | TRC-125

Connector principle = Ball head clevis joint (similar to the proven trailer hitch design)

Improved assembly/disassembly for large sizes. Faster assembly with less effort

# Energy Chain System®

## Series Triflex® R

### Assembly Instructions - TRE Series

#### Assembly | TRE-30 · TRE-40 · TRE-60 · TRE-70 · TRE-85 · TRE-100

Hold two pieces together at inner radius and move socket up against the ball's wedged end.

Push until a clicking sound indicates a secure fit of socket onto the ball (Energy Chain® section exposed for the purpose of demonstration)

#### Separating | TRE-30 · TRE-40 · TRE-60

Bend Triflex® R into its radius and twist apart, counter-clockwise

#### Separating | TRE-70 · TRE-85 · TRE-100

Insert screwdriver into the opening of the socket from the top. Then twist apart, counter-clockwise

#### Filling | TRE-30 · TRE-40 · TRE-60 · TRE-70 · TRE-85 · TRE-100

Easy to fill - simply press cables in...

...and easy to take the cables out

# Energy Chain System®

## Series Triflex® R

### Assembly Instructions - TRL Series

#### Assembly | TRL-30 · TRL-40 · TRL-60 · TRL-70 · TRL-100

igus® Triflex® R TRL - very easy to assemble - simply press the ball into the socket, ready!

#### Separating | TRL-30 · TRL-40 · TRL-60 · TRL-70 · TRL-100

Just twist the ball slightly to remove it from its socket

#### Filling | TRL-40 · TRL-30 · TRL-60 · TRL-70 · TRL-100

Easy to fill - simply press cables in...

...and easy to take the cables out

#### Installation | Mounting bracket in this case, a "light" bracket with an intermediate connection

Easy assembly - open the mounting bracket, install the chain and snap the mounting bracket shut again.

To open, push a screwdriver against one side or manually pry apart

## Assembly Tips

Easy assembly and quick access to cables and hoses thanks to a unique ball-and-socket design.

# Energy Chain System®

## Series Triflex® R

### TRC - Fully enclosed

.39"-1.70"

## Features &amp; Benefits

- ① High stability - Due to outer stop dogs, defined stops for radius and torsion
- ② Easy installation and dismantling - An injection molded component. No other components (steel cables, spring suspensions etc.) are required
- ③ High tensile strength due to special ball-and-socket principle, enables flexible movement along all axes
- ④ Impact-resistant, dirt-repelling, rugged and abrasion-resistant, smooth, rounded exterior
- ⑤ Triflex® R-Set - compact module for all movements on robots, which can be fixed on existing fastening points
- ⑥ Able to move multi-dimensionally - High degree of flexibility, even on the 6th axis. Twist up to approx.  $\pm 10^\circ$  per link possible in longitudinal axis. This assists guiding the cables and lines around difficult configurations
- ⑦ Small bend radius & short pitch - Space-saving installation
- ⑧ Easy attachment onto the robot/machine reduces setup time

## Usage Guidelines

- If a secure cable guide is required for multi-dimensional (3D-) movements
- If high torsional stability is required
- If the system has to be shortened or lengthened easily
- If a small bending radius is required
- If high tensile strength is important

- For circular movements with high loads
  - TwisterChain System
- If simple filling is required
  - Triflex® R, TRE
- If a simpler and cost effective solution is required
  - Triflex® R, TRL

## Series Triflex® R

### TRL - Light and economical

## Features &amp; Benefits

- ① Triflex® R light - save twice on purchasing and installation, single-piece element, easy to fill using Easy Chain® principle, matching Triflex® R standard mounting brackets
- ② High tensile strength due to special ball-and-socket principle, enables flexible movement along all axes
- ③ Easy opening mechanism for easy filling with cable and hose packages
- ④ Easy installation and dismantling - An injection molded component. No other components (steel cables, spring suspensions etc.) are required
- ⑤ Able to move multi-dimensionally - High degree of flexibility, even on the 6th axis. Twist up to approx.  $\pm 10^\circ$  per link possible in longitudinal axis. This assists guiding the cables and lines around difficult configurations
- ⑥ Small bend radius & short pitch - Space-saving installation
- ⑦ Economical and light mounting bracket with strain relief or intermediate link

## Usage Guidelines

- When an easy to fill, economical 3D Energy Chain® is needed
- When 3D Energy Chain® for easily manageable operating conditions is needed
- When a very easy to use 3D Energy Chain® is needed

- For circular movements with high loads
- **System TwisterChain®**
- If a fully enclosed solution is required
- **Triflex® R - TRC**
- When a rugged, easy to fill variant is needed
- **Triflex® R - TRE**

**Option 1: Standard mounting brackets**

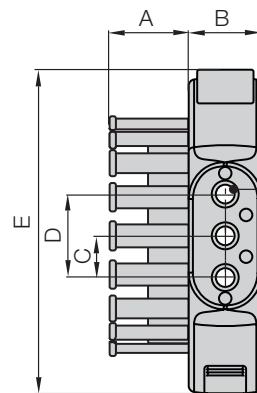

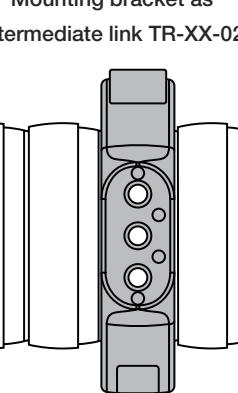

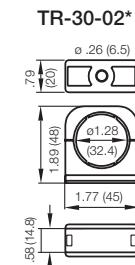

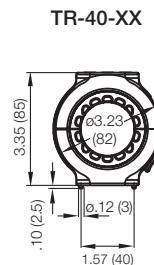

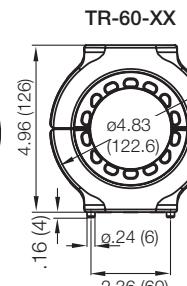

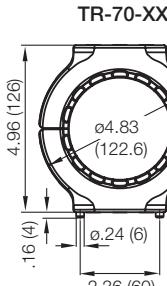

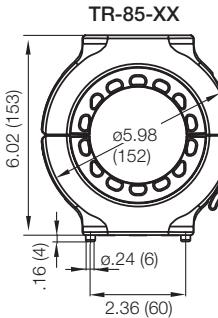

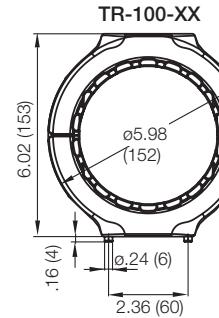

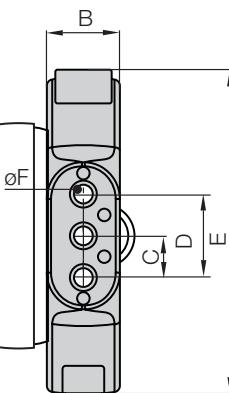

- Quick and easy installation
- Short downtimes when swapping a harnessed Triflex® R system
- Mounting bracket ① with strain relief available
- Mounting bracket also as ② intermediate link
- Quick assembly by means of snap lock
- Bracket holes for common robot types
- Can be attached at the ends or anywhere in between

TRC/TRE-125 Dimensions and delivery time upon request!

\* = dimensions in drawing

Strain relief is possible on the moving end and/or the fixed end.

Standard: Trough holes in ØF - Option: with insert nuts, steel, M6/M8

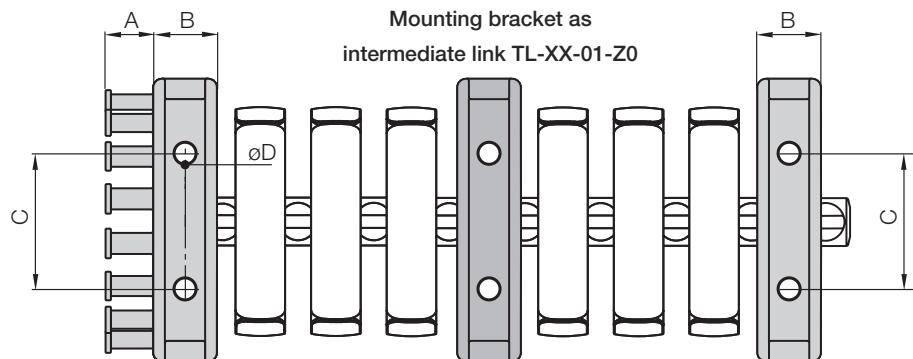

### Option 2: Light mounting brackets

- Standard for TRL version, also compatible with all Triflex® R versions (TRC/TRE)
- Mounting bracket ① with strain relief available
- Mounting bracket also as ② intermediate link available
- Economical and light
- For simple 3D-movements and loads
- Consists of two halves - easy to assemble

**Option 3: Swivel mounting brackets**

- Swivel bearings are used to lessen the motion of the cables requiring guidance, while allowing for extreme twisting and bending. This relieves cables with highly sensitive bending radii (such as fiber optic cables) when following a robot's movements.
- Available in 2 designs (with or without strain relief)
- Pivoting bearing with a maintenance-free igubal® ball-and-socket joint
- Minimization of critical bending cycles
- Gentler motion

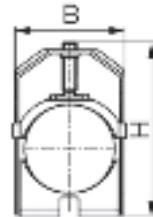

For Series	Swivel bracket with tie-wrap plate	Swivel bracket as intermediate link	A in. (mm)	B in. (mm)	C in. (mm)	D in. (mm)	E in. (mm)	F in. (mm)	G* in. (mm)

\*only for TR-XX-03

**Strain relief systems (only for TRC/TRE) - Secure mounting of large cross sections with igus® standard Chainfix clamps**

- 3 versions available for each size
- Multi-axially adjustable, for optimal positioning
- Suitable on all standard robot extensions: Ø 30 mm, Ø 32 mm, Ø 34 mm

Single clamp housing, including top/bottom saddle clamps

Part No. Steel	Part No. Stainless Steel	in.	(Ø mm)	B	H
CFX12-1	CFX12-1E	.24 -.47	(6 - 12)	.63 (16)	1.57 (40)
CFX14-1	CFX14-1E	.47-.55	(12 - 14)	.71 (18)	1.97 (50)
CFX16-1	CFX16-1E	.55-.63	(14 - 16)	.79 (20)	2.05 (52)
CFX18-1	CFX18-1E	.63-.71	(16 - 18)	.87 (22)	2.13 (54)
CFX20-1	CFX20-1E	.71-.79	(18 - 20)	.94 (24)	2.20 (56)
CFX22-1	CFX22-1E	.79-.87	(20 - 22)	1.02 (26)	2.28 (58)
CFX26-1	CFX26-1E	.87-1.02	(22 - 26)	1.18 (30)	2.64 (67)
CFX30-1	CFX30-1E	1.02-1.18	(26 - 30)	1.34 (34)	2.80 (71)
CFX34-1	CFX34-1E	1.18-1.34	(30 - 34)	1.50 (38)	2.95 (75)
CFX38-1	CFX38-1E	1.34-1.50	(34 - 38)	1.65 (42)	3.11 (79)
CFX42-1	CFX42-1E	1.50-1.65	(38 - 42)	1.81 (46)	3.27 (83)

The dimensions given for H in the table is based on the maximum cable diameter. Cables with smaller diameters may result in lower overall clamp housing heights.

Igus® recommends strain relieving the moving end of a robotic application.

### Triflex® R Quick exchange kit

- Ideal for Triflex® R ReadyChain®
- One-time-only alignment
- No repeat alignment upon exchange of ReadyChain®
- Exchange of the Triflex® R unit including cables without any tools

For	Part No.
Series	Quick exchange kit

**RS Assembly**

Triflex® RS is a very compact universal assembly that is mounted to installation points available on the robot. Thanks to the low profile and the Triflex® R chain guide parallel to the robotic arm, applications with extremely low installation space can be achieved. Triflex® RS can be installed parallel to the robotic arm. Triflex® RS with integrated spring mechanism allows efficient energy supply to the robotic head without stress on the cables. The Triflex® R kit offers all advantages of proven Triflex® accessories, such as the FlexBar, universal assembly kit and fiber rod module in one system. All Triflex® R features are also included in the universal Triflex® RS module.

- One package for all applications, immediately installable
- Integrated fiber rods to retrack cables
- First choice for robotic applications with narrow installation space
- Saves space through low installation height and close routing on the robotic arm
- Excellent service life
- Universally applicable

Triflex® RS - Extremely flat design,  
guides close to the robotic arm

- ① Mounting brackets for safe fastening
- ② Glide lead-through for a close and parallel guidance on the robotic arm
- ③ Limit stop dog for a defined free movement
- ④ Integrated recuperating spring prevents loop formations
- ⑤ Single module, space-saving and quickly mounted on robot

Integrated recuperating spring  
prevents loop formations

Triflex® R-Set with cover for the additional support  
of switch cabinets or valve terminals

Triflex® R-Set with cover (barrier)

- Creates more mounting space on robots - e.g. for switch cabinets or valve terminals
- For upside down applications
- Enables the use of Triflex® RS in applications with extreme movements

43 Adapter brackets for robots from stock

- 43 adapter bracket types from stock for many different robots
- For all Triflex® RS modules
- For assembly to the side or on top

Triflex® R installed on axis 6

Part No. TR-907-667-Inner Ø

- One axis diameter (Ø30 mm) for all robots
- Easy and fast assembly
- For Triflex® R mounting bracket with CFX clamps (TR-XX-20-30)
- For Triflex® R mounting bracket with profile rail (TR-XX-21-30)
- For TR-XX-22-30 Quick exchange kit

**Abrasion Protectors**

Protectors are available for maximum cycle life in heavy duty applications with hard impacts and rubbing of Triflex® R against the robot.

- Fast and simple installation and replacement
- Shock absorbing
- Lightweight
- Glides smoothly along robot contours
- Attaches to any link

For Series	Part No.	ØD in. (mm)	A in. (mm)
TRC/TRE-40	TR-40-10	2.20 (56)	1.06 (27)
TRC/TRE-60	TR-60-10	3.31 (84)	1.57 (40)
TRC/TRE-70	TR-70-10	4.13 (105)	1.97 (50)
TRC/TRE-85	TR-85-10	4.65 (118)	2.32 (59)
TRC/TRE-100	TR-100-10	5.24 (133)	2.64 (67)

**Triflex® R Cover - Heat Shield**

- Protects against weld and metal splatter up to 1082°F (600°C) short term
- Ends are elasticized for sealing
- Easy to replace using hook and loop tape
- Standard length from stock
- Asbestos-free
- Coating: Aramid

For Series	Part No. XX= Length of the protective cover - choose from the following standard lengths Example: TR-40-15- [0500]
TRC/TRE-40	TR-40-15-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-60	TR-60-15-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-70	TR-70-15-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-85	TR-85-15-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-100	TR-100-15-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)

**Triflex® R Cover - Protective Jacket**

- Temperatures up to room temperature
- Ends are elasticized for sealing
- Easy to replace using hook and loop tape
- Standard length from stock
- Silicone-free
- Coating: none

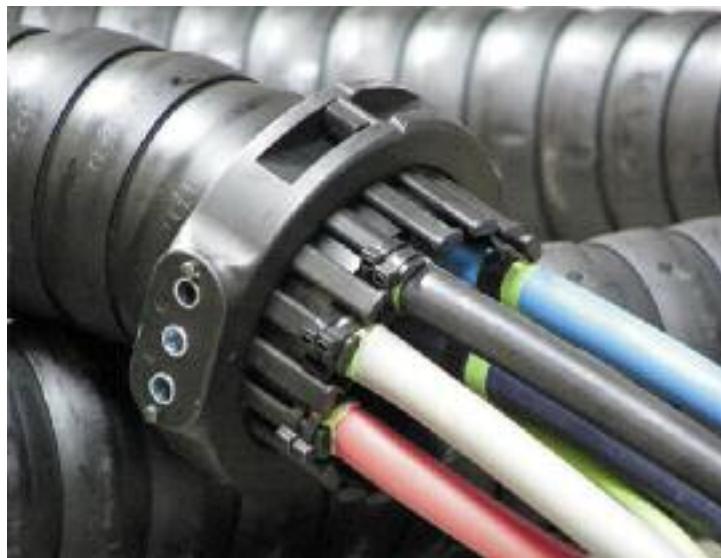

For Series	Part No. XX= Length of the protective cover - choose from the following standard lengths Example: TR-40-16- [0500]
TRC/TRE-40	TR-40-16-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-60	TR-60-16-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-70	TR-70-16-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-85	TR-85-16-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-100	TR-100-16-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)

**Triflex® R Cover - Light Protective Jacket**

- Temperatures up to room temperature
- Ends are elasticized for sealing
- Easy to replace using hook and loop tape
- Standard length from stock
- Silicone-free
- Coating: none

For Series	Part No. XX= Length of the protective cover - choose from the following standard lengths Example: TR-40-17- [0500]
TRC/TRE-40	TR-40-17-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-60	TR-60-17-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-70	TR-70-17-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-85	TR-85-17-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)
TRC/TRE-100	TR-100-17-XX      in. (mm)      19.68 (500)      39.37 (1000)      59.06 (1500)      78.74 (2000)

Space-saving integrated strain relief at the connection point

When filling Triflex® R, sufficient clearance needs to be provided for all electric cables, pneumatic and media hoses, in order to compensate for forces from relative motion between the cables and hoses.

As a rule of thumb, the following values apply:

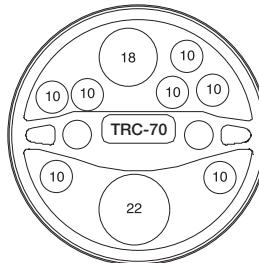

- The total of cable/hose diameters must not exceed 60% of the usable cross section of their Triflex® R component.
- A clearance of at least 10% (min. 1 mm) between any two cables/hoses
- Cables/hoses need to be able to move freely inside the Triflex® R.

Please refer to the chart on this page for an overview of available cross sections for Triflex® R.

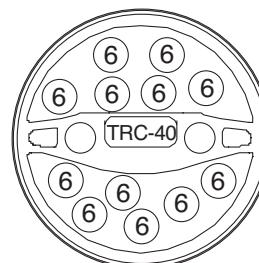

**Example:  
Cross Section Calculation**

$A_{\text{conduit}} = \frac{d^2 \times \pi}{4}$
<b>Examples:</b>
$A_1 = 10 \text{ mm} \times 10 \text{ mm} \times \pi/4$
$= 78.5 \text{ mm}^2 \times 7 \text{ (number of conduits)}$
$= 549.50 \text{ mm}^2$
$A_2 = 18 \text{ mm} \times 18 \text{ mm} \times \pi/4$
$= 254.34 \text{ mm}^2$
$A_3 = 22 \text{ mm} \times 22 \text{ mm} \times \pi/4$
$= 379.94 \text{ mm}^2$
$A_{\text{conduit}} = A_1 + A_2 + A_3 = 1183.7 \text{ mm}^2$

**Filling Example: TRC-70**

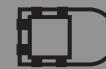

**Filling Example: TRC-40**

The smaller the relation between usable cross section and the total of cable/hose diameters, the less the stress of the cables.

Series	Usable Cross Section
TRC/TRE-30	.48 inch <sup>2</sup> (313.0 mm <sup>2</sup> )
TRC/TRE-40	.78 inch <sup>2</sup> (508.0 mm <sup>2</sup> )
TRC/TRE-60	1.77 inch <sup>2</sup> (1144.6 mm <sup>2</sup> )
TRC/TRE-70	2.77 inch <sup>2</sup> (1788.0 mm <sup>2</sup> )
TRC/TRE-85	3.77 inch <sup>2</sup> (2431.0 mm <sup>2</sup> )
TRC/TRE-100	4.92 inch <sup>2</sup> (3177.0 mm <sup>2</sup> )

**Customer-specific special cable for  
robotic and torsion applications**

- Control, motor, servo, bus and data cables
- Shielded and unshielded
- Outer jacket material: PVC, PUR, TPE
- Torsion area according to requirement
- Sectors: Robotic and 3D applications

The service life of cables in torsion applications depend disproportionately on the exact progression of the angle of torsion and the cable length of the exact application. As a single test facility is often insufficient, Chainflex® cables are tested on various constructional systems. Your torsion cables are tested as realistic as possible for your application. For this purpose, igus® uses up to 8 different test facilities in the in-house laboratory.

**Torsionable Chainflex® robotic cables  
for +/-180° angle of twist per meter length**

Chainflex® CFROBOT9 - PUR-Hybrid cable, torsionable

Chainflex® CFROBOT8 - PUR-Bus cable, torsionable

Chainflex® CFROBOT6 - PUR-Motor cable, torsionable

Chainflex® CFROBOT7 - PUR-Motor cable, torsionable, shielded

Chainflex® CFROBOT5 - TPE-Fiber optic cable, torsionable

Chainflex® CFROBOT - Single-core TPE robotic cable

**Triflex® R - Tests in the igus® lab**

Testing facility at the igus® laboratory

Torsion test of CF-ROBOT

**Triflex® R - Chainflex® Robot Cable Package**

Robot cables and other conduits are delivered as harnessed kits.

## Triflex® R - ReadyChain® - Chainflex® cable/hose Packages

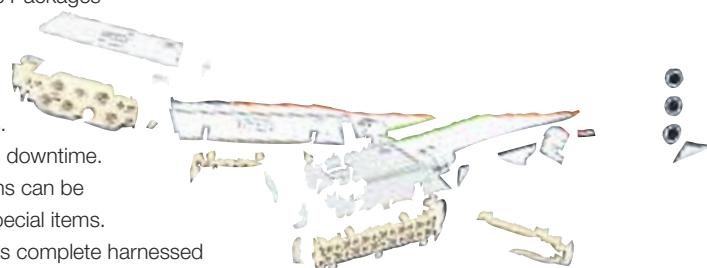

Turnkey harnessed ReadyChain® cable and hose packages, equipped with Chainflex® cables for use on robots. Delivered complete with cables, hoses, connectors and accessories.

ReadyChain® minimizes setup time and reduces downtime.

Cable and hose packages for robotic applications can be customized with Chainflex® products or other special items.

Robot cables and other conduits are delivered as complete harnessed systems.

Under the igus® CFRobot range, control, data, servo- and motor cables are available.

E-Z Triflex®

# E-Z Triflex® - for 2D and 3D movements, easy access to cable from both sides

The Triflex® series has been developed to safely guide cables through a 3D movement. With E-Z Triflex®, the installation of cables and hoses is easy. Cables can be inserted into the Energy Chain® from the top or bottom through an opening along the length of the chain. The unique modular design of Triflex® enables very complex movements through all three axes.

## Typical industries and applications

- Machine Tools
- Robots
- Material handling
- Plastics machinery
- Construction machines
- Vehicles
- General machinery
- Medical equipment

iF-Design awards for  
Easy Triflex®-design

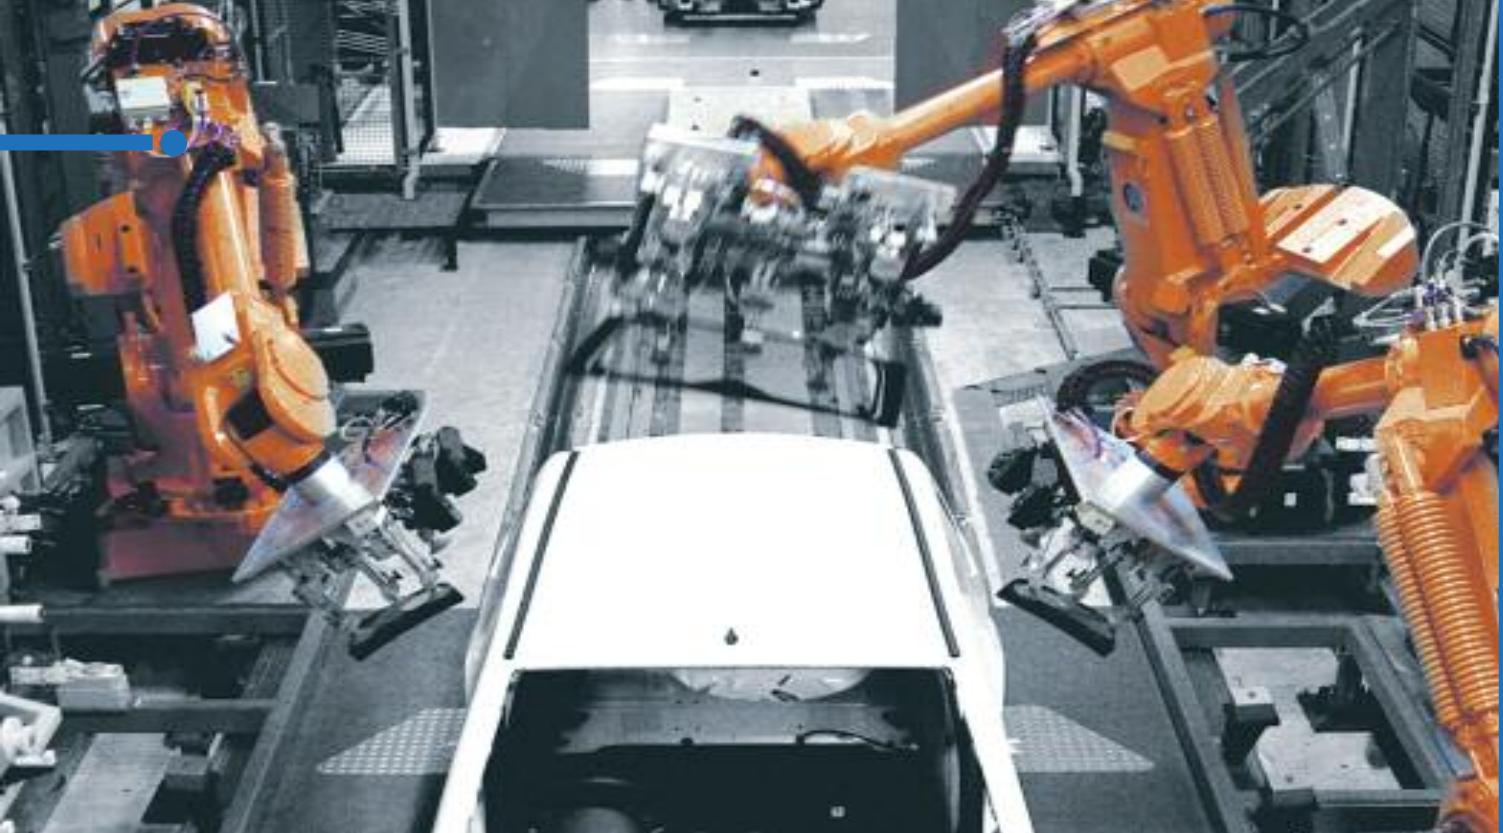

Torsional motion  
possible

UL94-V2  
classifications

Robots with igus® E-Z Triflex® Energy Chains® on an assembly line

E-Z Triflex® Energy Chains® for multi-dimensional movements on a production line

E-Z Triflex® Energy Chains® also for easy applications - here an aesthetic application

## E-Z Triflex® - The Solution for Your Office

Dangling lines are risky and unaesthetic. The new solution: E-Z Triflex® and Triflex® Energy Chains® with special connector elements for your desk. They offer reliable, movable and elegant protection for lines, are quickly installed and are available in many variations. Naturally they can be installed at any time as retrofits. Simply press the lines from two sides. This is possible at any point desired.

# Energy Chain System®

## E-Z Triflex® Series

### Select this modular Energy Chain System® for:

- 3-axis motions in all kinds of machinery
- Some robotics applications
- Very fast cable assembly with "E-Z" principle
- Simple filling from two sides
- Where rectangular shapes fit better
- Combination of different bending radii and movement directions
- Lengthen and shorten anywhere
- KMA mounting brackets with integrated strain relief
- You can find more technical data about the material, chemical resistance, temperatures ► Design, Chapter 1

### Selection table

#### Single-axis and double-axis movement:

Series	Inner Height		Inner Width		Outer height/Outer Width		Bending Radii	
	<i>Bi 1/Bi 2</i>		<i>Bi 3</i>		<i>Ba</i>		<i>R</i>	
	in.	(mm)	in.	(mm)	in.	(mm)	in.	(mm)

# Energy Chain System®

## E-Z Triflex® Series

### E-Z Triflex® Series - Assembling

Twist and snap in

Shorten and lengthen  
at any given point

### E-Z Triflex® Series - Separating

Lever the E-Z Triflex®  
side link with screwdriver

Twist and separate - For Series E333  
you have to separate the "middle" pin

### E-Z Triflex® Series - Filling

Easy to fill - simply press cables in...

...and easy to take the cables out

## Price Index

Series E332/E333

## Special Options Available

Flammability Class  
VDE 0304 IIC UL94 V2

Torsion motion possible

iF-Design Award Winner

## Assembly Tips

Easy to fill - simply press cables in

## Usage Guidelines

- If simple cable installation is required with complex movements
- If simple cable installation from both sides with complex movements is required
- For repair and supplementation of existing Triflex® Systems

- For circular movements with high loads
  - TwisterChain® System, from Chapter 8
- If chip protection is necessary
  - Triflex® System, from Chapter 8

Energy Chain System®  
E-Z Triflex® Series

## Features &amp; Benefits

- ① KMA split-open mounting bracket with integrated strain relief
- ② Patented "push-button-principle"
- ③ iF-Design Award Winner
- ④ Different bending radii and directions can be combined
- ⑤ Robotics applications possible
- ⑥ Shorten and lengthen at any given point
- ⑦ 3-Axis motions in machinery of all kinds
- ⑧ Simple filling from 2 sides "E-Z Chain®"-principle - simply press in cable along the inner radius or the outer radius

## Order Example: Complete Energy Chain®

Please indicate chain length or number of links. Example:

6.56 ft (2 m) **E333-50-100/100-0**

**Energy Chain®**

1 Set **333-50-12PZ**

**Mounting Bracket**

## Mounting Brackets

## Option 1: KMA

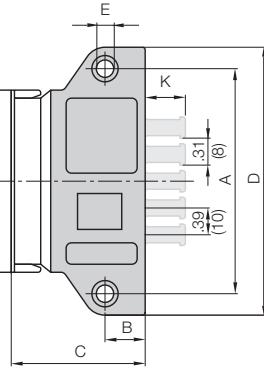

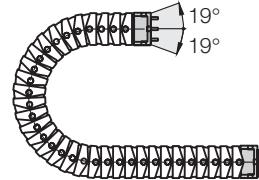

- Corrosion resistant
- Strain relief with tiewrap plate

333-50-1PZ

333-50-2PZB

333-50-1PZ  
Moving end333-50-2PZB  
Fixed end  
(with tiewrap plate  
333-50-ZB)

## Part No. structure

333-32- 12 PZB

With assembled strain  
relief tiewrap plates  
Full set = 12  
Mounting brackets for  
selected chain type

## Full set, for both ends:

333- 32- 12 PZB +tiewrap plate

## Single-part order:

333- 32- 1 PZB +tiewrap plate

Mounting bracket with bore

333- 32- 2 PZB +tiewrap plate

Mounting bracket with pin

For high loads we recommend screwing the  
mounting brackets to the chain. If you have  
any questions, please give us a call.

# Triflex®

# Triflex® - fully enclosed, for 2D and 3D applications

The Triflex® series has been developed to safely guide cables during a 3D movement. In this case, the flexibility of a hose is combined with the stability of an Energy Chain® with a fixed, defined radius. This unique modular range enables very complex movements. As example: Combination of chain links moving in single, double and triple axes in an Energy Chain®.

## Typical industries and applications

- Machine tools
- Robots
- Handling equipment
- Material handling
- Plastics machinery
- Construction machines
- Vehicles
- Machinery of all kinds
- Medical equipment

iF-Design awards for  
Easy Triflex®-design

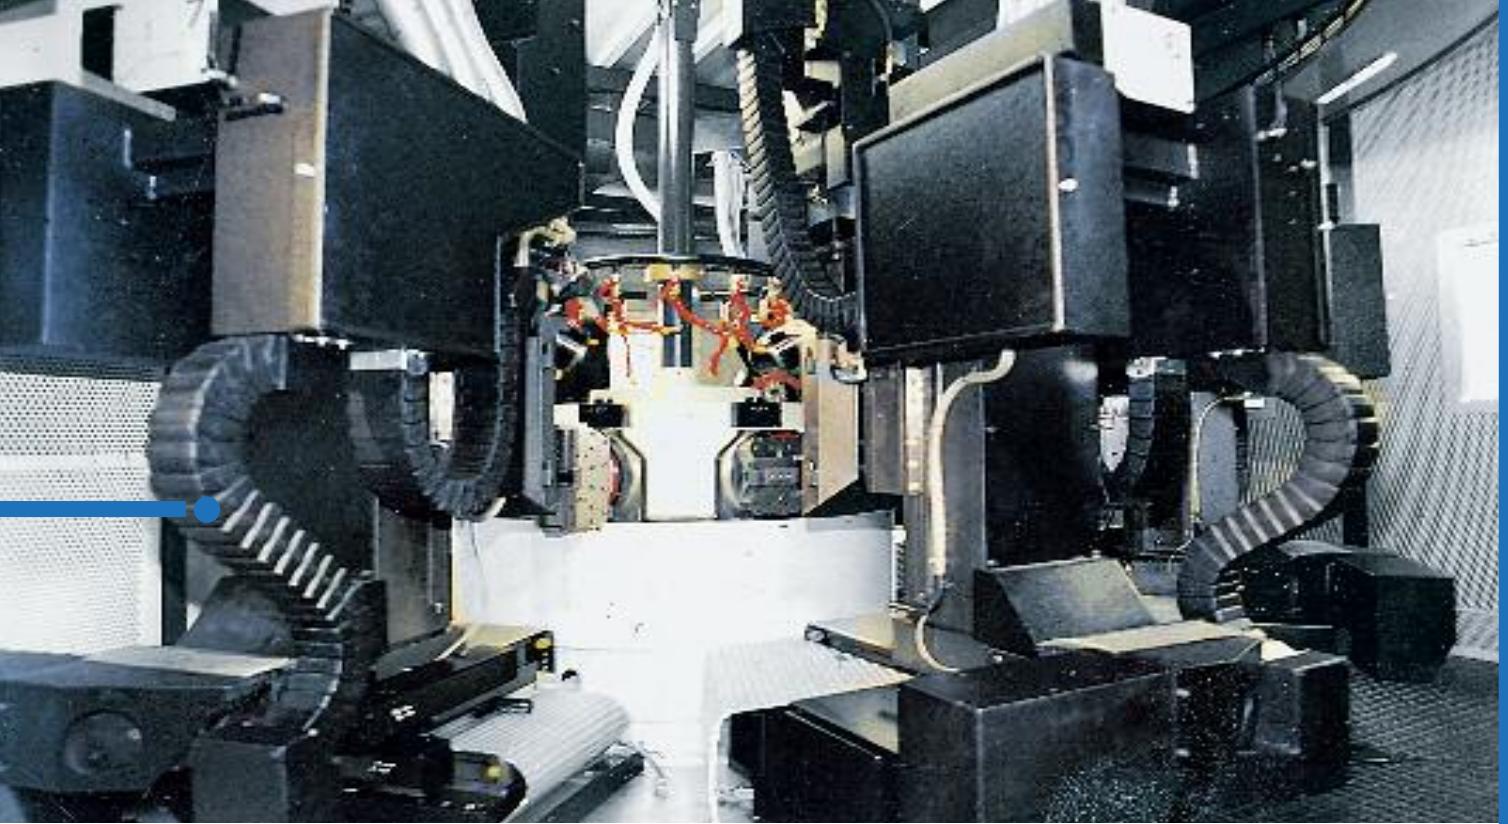

Torsional motion  
possible

UL94-V2  
classifications

Various Triflex® tubes on the inside of a machining center

Triflex® for 3 movement directions combined  
with Triflex® for 1 movement direction

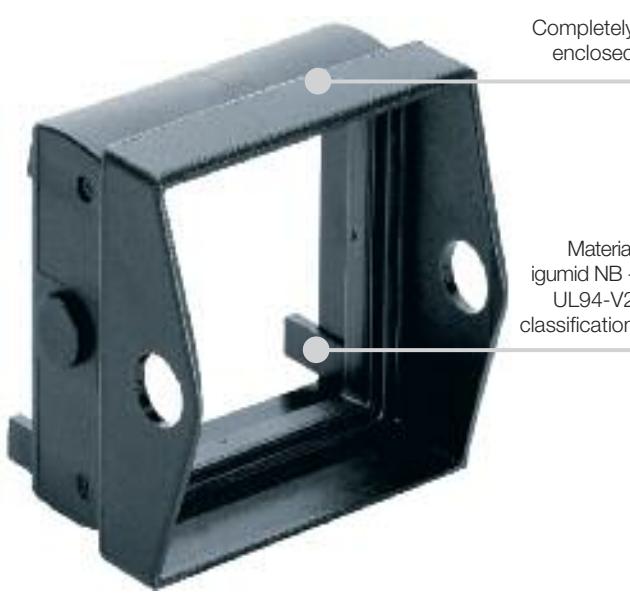

Triflex® 332 as unsupported link  
from machines to control desk

# Energy Chain System®

## Triflex® Series

### Selection Guide

energy chain® configurator 

#### Select this modular, robust, Energy chain system® for:

- 3-axis motions in machinery of all kinds
- Dirty environments
- High tensile strength
- Where rectangular shapes fit better
- Side-mounted unsupported
- Completely enclosed - protection against dirt and chips
- Combinations of varying bending radii and moving axes
- Connecting and separating possible at every link
- Flanged mounting brackets or mounting brackets angle, galvanized steel
- Series 352 and 353 snap-open
- Combination Series 353/333 possible
- Cost-effective design for complex movements
- You can find more technical data about the material, chemical resistance, temperatures ► **Design, Chapter 1**

#### Selection table

##### Single-axis movement:

Series	Inner height/Inner width □ Bi		Outer width/Outer height □ Ba		Bending radii R	
	in.	(mm)	in.	(mm)	in.	(mm)
331-16	.63	(16)	1.02	(26)	1.50 - 3.94	(038 - 100)
331-32	1.26	(32)	1.97	(50)	2.95 - 9.84	(075 - 250)
331-50	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)
331-75	2.95	(75)	3.78	(96)	5.51 - 11.81	(140 - 300)

##### Double-axis movement:

Series	Inner height/Inner width □ Bi		Outer width/Outer height □ Ba		Bending radii R	
	in.	(mm)	in.	(mm)	in.	(mm)
332-16	.63	(16)	1.02	(26)	1.50 - 3.94	(038 - 100)
332-32	1.26	(32)	1.97	(50)	2.95 - 9.84	(075 - 250)
332-50	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)
332-75	2.95	(75)	3.78	(96)	5.51 - 11.81	(140 - 300)

##### Triple-axis movement:

Series	Inner height/Inner width □ Bi		Outer width/Outer height □ Ba		Bending radii R	
	in.	(mm)	in.	(mm)	in.	(mm)
333-16	.63	(16)	1.02	(26)	1.50 - 3.94	(038 - 100)
333-32	1.26	(32)	1.97	(50)	2.95 - 9.84	(075 - 250)
333-50	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)
333-75	2.95	(75)	3.78	(96)	5.51 - 11.81	(140 - 300)

##### Snap-open Series:

Series	Inner height/Inner width □ Bi		Outer width/Outer height □ Ba		Bending radii R	
	in.	(mm)	in.	(mm)	in.	(mm)
351-50 Single	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)
352-50 Double	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)
353-50 Triple	1.97	(50)	2.68	(68)	3.94 - 9.84	(100 - 250)

# Energy Chain System®

## Triflex® Series

### Assembly Instructions

#### Triflex® Series - Assembling

Twist and snap in

Snap in pin "push-button-principle"

#### Triflex® Series - Separating

Release side link

Twist and separate

#### Triflex® Series 352 and 353 - Filling

To open Series 352 and Series 353 only - Insert screwdriver into slot on top of lid and push down

## Price Index

## Special Options Available

	Flammability Class VDE 0304 IIC UL94 V2
	Torsion motion possible
	iF-Design Award Winner

## Assembly Tips

Release side link, twist and separate

To open Series 352 and Series 353 only  
- Insert screwdriver into slot on top of lid and push down

## Usage Guidelines

- For applications that move within two or three axes (combined rotary and circular movements)
- If chip protection is required

- If every link must open on both sides
  - TwisterChain® system, **Chapter 8**
- For gliding applications
  - System E4, **Chapter 6**
- For rotary movements only
  - TwisterChain® system, **Chapter 8**

## Features &amp; Benefits

- ① KMA, flanged and angled mounting brackets available
- ② Combinations of varying bending radii and moving axes
- ③ Completely enclosed
- ④ Combination of Series 353 and Series 333 possible
- ⑤ Series 352 and 353 snap-open
- ⑥ Protection against dirt and chips
- ⑦ High tensile strength
- ⑧ Cost-effective design for complex movements
- ⑨ Assembling and separating at any given point

## Order Example: Complete Energy Chain®

Please indicate chain length or number of links. Example:

energy chain® configurator

6.56 ft (2 m) **332-50-100/100-0**

**Energy Chain®**

With 2 separators **351** assembled every 2nd link

**Interior Separation**

1 Set **338-50-12**

**Mounting Bracket**

# Energy Chain System® Triflex® Series

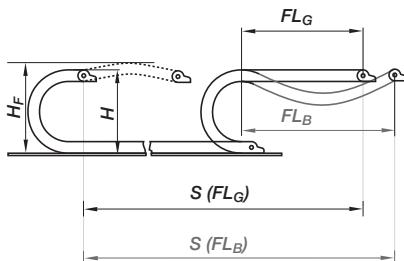

## Series 331/332/333

### Interior Separation

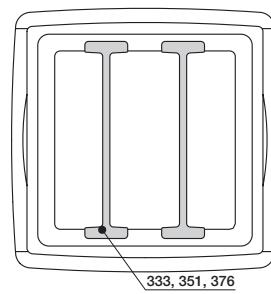

Modular separators are available as interior shelving for the igus® Triflex® System. They can be used for both vertical and horizontal sub-division. If the separators are assembled every other link and turned 90°, the tube can be sub-divided into four segments. We recommend ordering the tube pre-assembled, as subsequent assembly of separators is only possible after dismantling the tube. Please note that assembled separators have a different part number than unassembled separators.

Horizontal sub-division

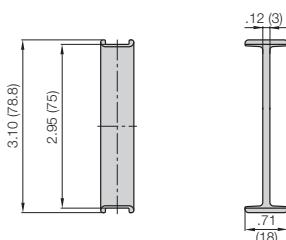

Vertical sub-division

333, 351, 376

## Option 3: angle

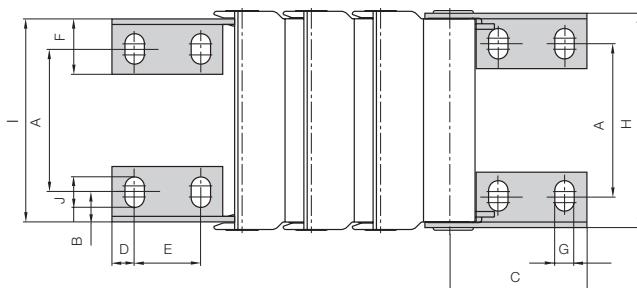

- Galvanized steel
- Electrically conductive
- Can be attached to top or bottom of the machine

338-16-1 / 338-75-1

Possible installation configurations -

338-16-2 / 338-75-2

Part No. structure

338- 32- 12

Full set = 12  
Width  
Mounting brackets for selected chain type

Full set, 4 parts

2 with pin / 2 with bore:

**338- 32- 12**

Single-part order:

**338- 32- 1**

Mounting bracket with bore

**338- 32- 2**

Mounting bracket with pin

# TwisterChain®

# TwisterChain® - Circular and spiral movements

TwisterChain® are modular and rugged Energy Chains® for circular and spiral movements. They safely supply robots on the rotary axis with energy and media.

- Circular, spiral motions up to 540°
- Fast cable replacement
- Modular, rugged design - variable widths
- Cable-friendly interior
- Crossbars snap open on both sides
- New guide troughs Type 01 and Type 02 (up to 360° motion)
- Variable interior separation
- Applicable in rotational speeds of up to 13.12 ft/s (4 m/s)
- With steel mounting brackets (electrically conductive)

## Typical industries and applications

- Robots
- Handling machines
- Packaging machines
- Glass machines
- General mechanical engineering

Circular movements up to 540° possible (with special attachments)

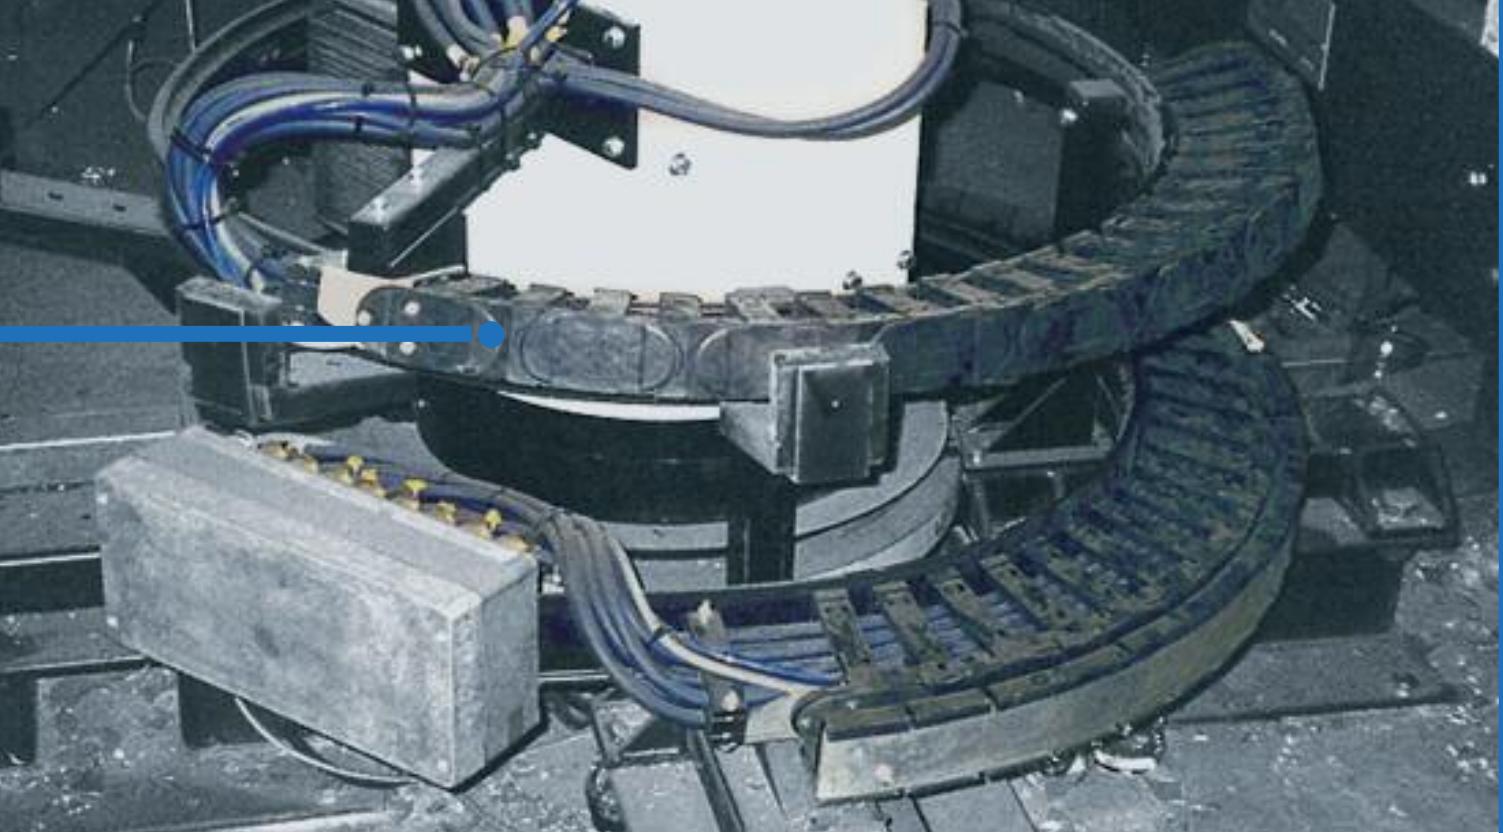

UL94-V2 classifications upon request

Two different types of Guide Trough Systems available

Combined spiral and rotary movement - igus® Series TwisterChain®

TwisterChain® for continuous industrial operation on a buckling arm robot (for welding applications, rotary movement 420°)

The robust link design allows also safety work in a dirty environment

## Save assembly time and costs - Better guidance for circular motion - increase cycle life!

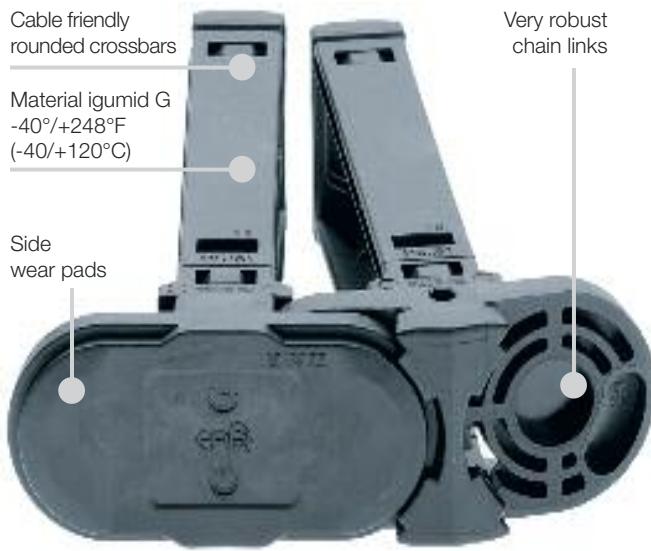

With the new TwisterChain® trough, complex adjustment work is eliminated and assembly time is reduced from six hours to just two hours. Thanks to its almost all-plastic design, noise levels are reduced while travel speed and service life are increased. Now available for widths and radii on TwisterChain® models series 2808, 3808 and 4008. Please call igus® for more information.

New guide trough system - Type 01

# Energy Chain System®

## TwisterChain® Series

### Select this modular "spiral" Energy Chain® for:

- igus® TwisterChain® for circular motions up to 540° (with special attachments)
- Fast cable change
- Modular design - variable widths
- Cable-friendly interior
- Crossbars can be opened on both sides
- New Guide Troughs Type 01 and Type 02 (circular motions up to 360°)
- Variable interior separation
- For rotational speeds of up to 13.12 ft/s (4 m/s)
- With steel (electrically conductive) mounting brackets
- You can find more technical data about the material, chemical resistance, temperatures ► Design, chapter 1

**Selection table**

Series	Inner height		Inner width		Outer width		Outer height		Bending radius		Circular Radii	
	<i>hi</i> in. (mm)	<i>Bi</i> in. (mm)	<i>Ba</i> in. (mm)	<i>ha</i> in. (mm)	<i>R</i> in. (mm)	AR in. (mm)						
2208-	1.10 (28)	2.07-4.43 (52.5-112.5)	3.15-5.51 (80-140)	1.65 (42)	2.17-5.91 (055 - 150)	11.81 (300)

## Energy Chain System® TwisterChain® Series

### Price Index

### Special Options Available

Circular movements up to 540° possible (with special attachments)

UL94-V2 classifications upon request

Two different types of Guide Trough Systems available

### Assembly Tips

Opening - push a screwdriver down vertically into the opening crossbar's groove. Using the screwdriver as a lever, loosen the opening crossbar

### Usage Guidelines

- If you require variable interior separation
- If cable/hose accessibility on both sides is required
- If rotational speeds up to 90°/s are required
- For spiral motion up to 540° possible with special attachments

- If very small or large diameters are required

#### ► Design, Chapter 1

- For applications using rotation angles over 400° please consult igus

### Order Example: Complete Energy Chain®

Please indicate chain length or number of links. Example:

6.56 ft (2 m) **2808-087-175/500-0**

Energy Chain®

With 2 separators **282** assembled every 2nd link

Interior Separation

1 Set **28080-34**

Mounting Bracket

# Energy Chain System®

## TwisterChain® Series

### Selecting the correct TwisterChain®

**igus®**

2208  
2808  
3808  
4008

If you would like us to design your TwisterChain® application, simply supply us with your requirements. Please use the igus® system design form at the end of this chapter. If you would like to specify the chain and the guide trough yourself, please work through the following points and enter the results on the calculation sheet at the end of the chapter.

#### 1. Determine the series and chain width

Specify which cables you would like to use for the chain. The type of cable(s) and the largest cable diameter determine the series and chain width selection. We recommend that you allow for a cable clearance of approx 20% of the chain's inner height and width. For instance, you must choose Series 3808 for a cable diameter of 1.18 (30 mm).

#### 2. Specify the outer and inner radius

Determine the construction space available to you (dimensions  $X_1$  and  $X_2$ )

**Example:**  $\alpha = 220^\circ/\text{max. cable diameter } .94"$  (24 mm) → Series 2808

$X_2 = 22.83$  (580 mm) →  $AR = 19.69$  (500 mm)

$X_1 = 12.20$  (310 mm) →  $IR_{\min} = 15.35$  (390 mm) → selection table → 15.43 (392 mm)

#### 3. Specify the bending radius

$$H_F = 18.11 \text{ (460 mm)} \rightarrow H \leq 16.14 \text{ (410 mm)} \rightarrow R = \frac{H-h_a}{2} = 7.00 \text{ (178 mm)} \rightarrow R175^*$$

\*(next smallest radius)

► Result: Series 2808, Part No. 2808-087-175/500

#### 4. Calculate the required number of links

$$\text{Number of links: } = \frac{\pi \times AR \times \alpha}{360^\circ \times T} + \frac{K}{T}$$

- The resulting number of links must always be rounded up!
- The mounting brackets may be attached only to the outside plates of the TwisterChain®. Consequently, the number of links **must always be rounded up to the next highest odd number!**

#### Recommendations for design without additional components

#### Legend

$a$	= Acceleration
$\alpha$	= Angle of rotation
$AR$	= Outer E-Chain radius
$Ba$	= Outer E-Chain width
$Bi$	= Inner width
$FZ_{\max}$	= Max. additional load
$H$	= Nominal clearance height
$ha$	= Outer E-Chain height
$hi$	= Inner E-Chain height
$H_F$	= Required clearance height incl. 1.97" (50 mm) clearance
$IR$	= Inner radius
$K$	= Series-dependent add-on for bending radius
$n$	= Number of links
$R$	= E-Chain Bending radius
$T$	= Pitch
$v$	= Speed
$X_1$	= Inner machine construction space
$X_2$	= Outer radius, incl. clearance
$R_{LK}$	= Distance pivot point/outer mounting holes

The following clearances are absolutely essential for proper design function:

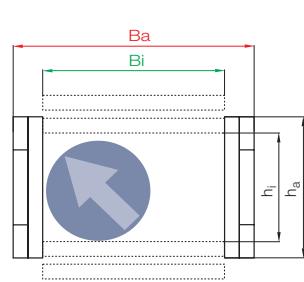

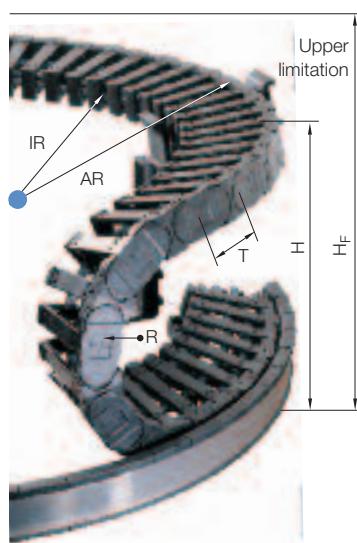

$IR_{\min} = X_1 + 3.15"$  (80 mm)

$X_2 \min = AR + 3.15"$  (80 mm)

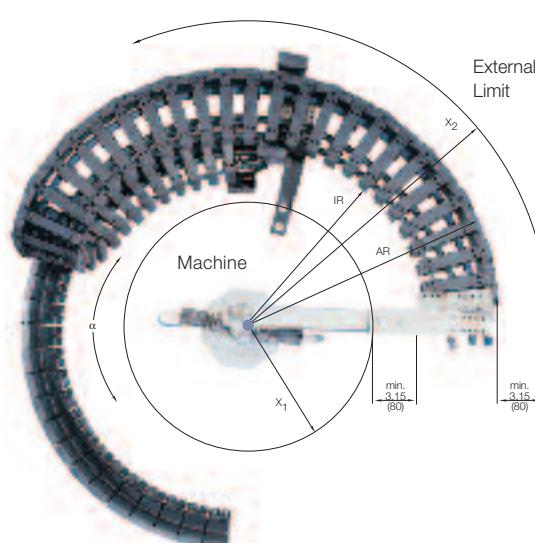

$H_F = H + 1.97"$  (50 mm)

Chain height including clearance

If your calculations exceed our recommendations, please contact igus®. We offer special solutions and many additional components!

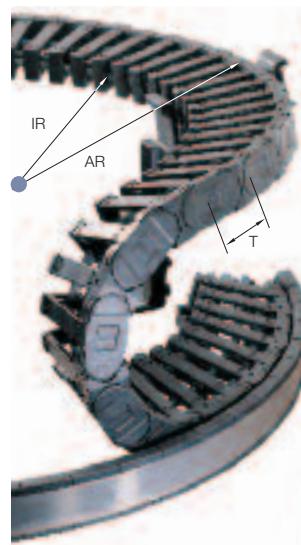

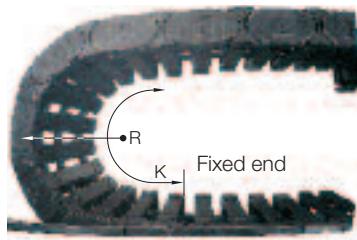

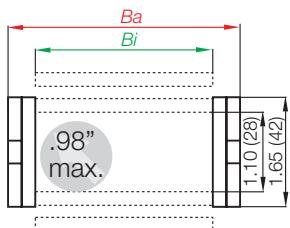

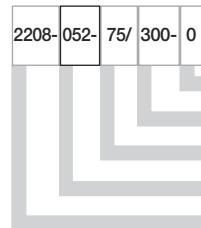

See Legend at upper right for drawing definitions.

4008	40080-34	40080-3	40080-4

Other connection dimensions for mounting the guide trough, ► See Page 8.74

The guide trough must be mounted at the fixed point of the TwisterChain® as shown by the drilling template in the illustration. The following bolted connections are permitted:

- Through-hole: 4 x Ø .26 - .28" (6.6 - 7 mm)
- Mounting only with bolts: 4 x M6 bolts

TwisterChain® for continuous industrial use on a buckling arm robot (for welding applications, rotary movement 420°)

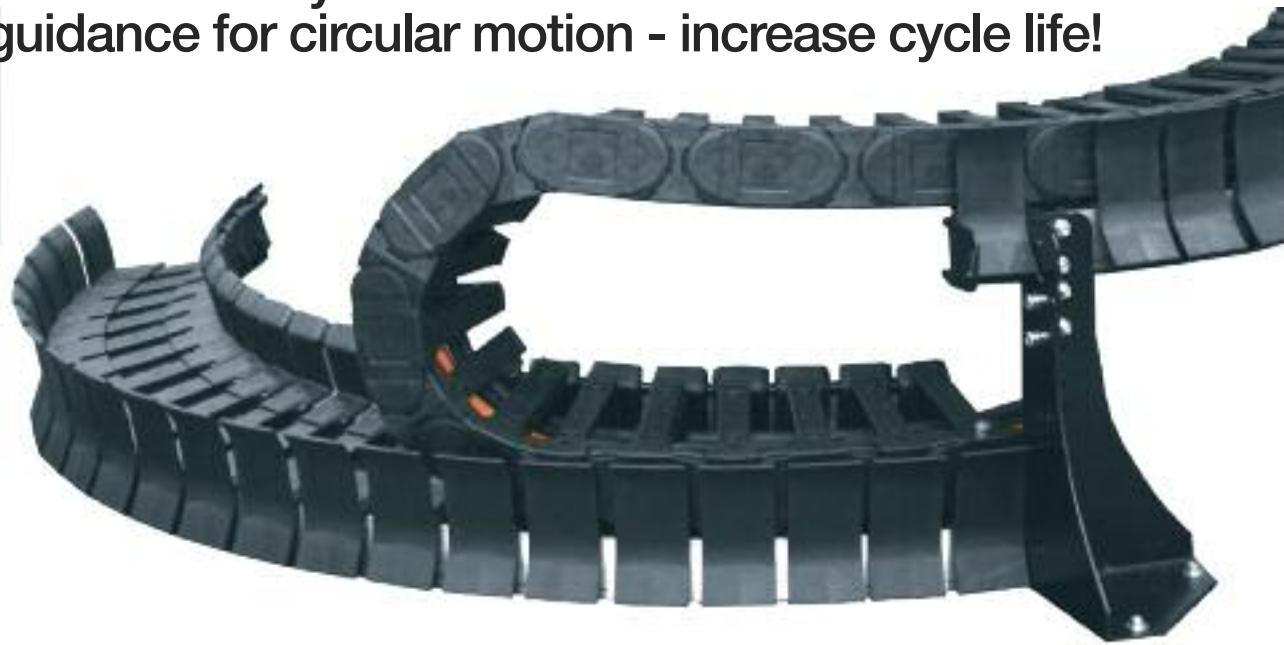

TwisterChain® in a guide trough for rotary movements on an articulated robot

PDF: [www.igus.com/e-chain-pdfs](http://www.igus.com/e-chain-pdfs)

RoHS info: [www.igus.com/RoHS](http://www.igus.com/RoHS)

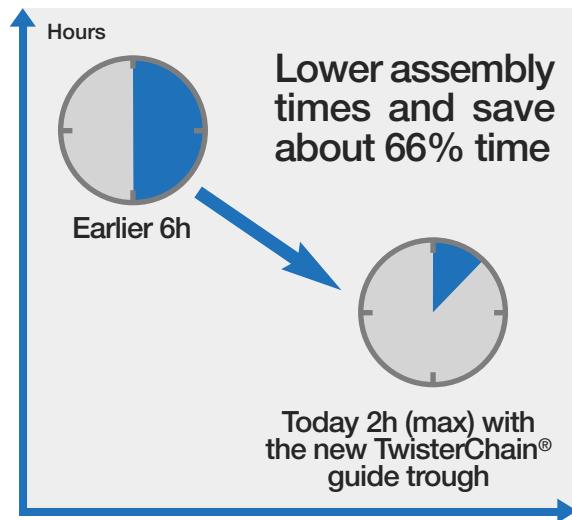

## Save assembly time and costs - Better guidance for circular motion - increase cycle life!

With the new TwisterChain® trough, complex adjustment work is eliminated and assembly time is reduced from six hours to just two hours. Thanks to its almost all-plastic design, noise levels are reduced while travel speed and service life are increased. Now available for widths and radii on TwisterChain® models series 2808, 3808 and 4008. Please call igus® for more information.

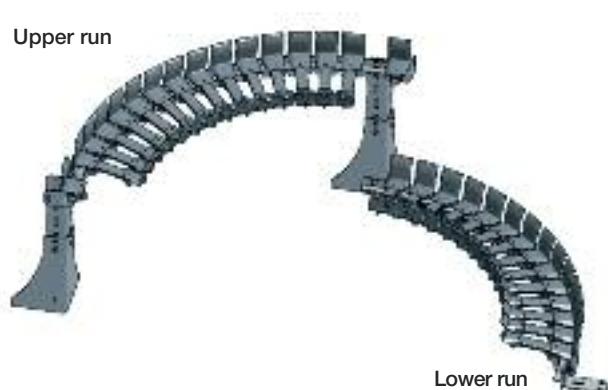

- Much smoother and quieter motion of the TwisterChain® in the trough due to continuous guidance of upper run
- Preassembled delivery possible
- Easy adjustment and alignment and handling
- Assembly time reduced from 6 hours to 2 hours

With the new Twister trough, the previously complex adjustment work is clearly minimized

Easy adjustment and alignment on the robot, due to the pre-defined angles and pre-drilled mounting holes

Less parts, easier handling -  
Illustration shows a 180° application

TwisterChain® in the new igus® guide trough for rotary movements in a buckling arm robot -  
Durable and rugged: Prototype successfully tested in over 1,000,000 cycles

PDF: [www.igus.com/e-chain-pdfs](http://www.igus.com/e-chain-pdfs)  
Specs/CAD/RFQ: [www.igus.com/e-chains](http://www.igus.com/e-chains)  
RoHS info: [www.igus.com/RoHS](http://www.igus.com/RoHS)

The delivery of an igus® TwisterChain® includes the guide trough, which affords certain advantages:

- Guidance of the chain
- Minimized wear on the chain
- Optimal running smoothness
- Rotational angle up to 400°

The modular design of the guide trough makes it possible to connect a large number of chain, circle and bending radii by using the same trough sections. If the chain radius changes, the trough can simply be adapted without purchasing a completely new trough. The table below will assist you in selecting the right guide trough system. The specified part number includes the complete trough system. In all cases, you should state the TwisterChain® series when ordering.

## Order Example

9	4008-	5-	180-	600/	06-	250
9	XXXX-	5-	180-	600/	Bi -	R

Part No. structure - guide trough  
94008-5-180-600/06-250

- Energy Chain® bending radius, please add appropriate value
- Bi - widths index, please add appropriate value
- Outer radius (AR)
- Trough angle (Standard 180°, 135°, 90°, 45°)
- Trough version (-5- with and -4- without bottom support)
- Selected Series (2208, 2808, 3808 or 4008)
- Guide trough

### Cable and Hose package for igus® TwisterChain®

Number	Type	Ø	Weight (lbs/ft)	Permitted Bending Radius

### Dimensions

X<sub>1</sub> in mm .....  
X<sub>2</sub> in mm .....  
H<sub>F</sub> in mm .....  
Angle of rotation α\* in ° .....

\* On machine elements which move to the left and to the right following a circular path, the angle of rotation can be determined by adding the two angles.

### Operating data

Rotations/day .....  
Days/year .....  
Speed in ft/s .....  
Acceleration in ft/s<sup>2</sup> .....

Remarks:

### Environment

Temperature in °F .....  
Moisture yes  no

**Please copy,  
fill in, and fax  
this page.**

**Thank you!**

## Calculation assistance

This calculation sheet should help you to select the right igus® TwisterChain® system for your application. Please consult igus® if you have any questions.

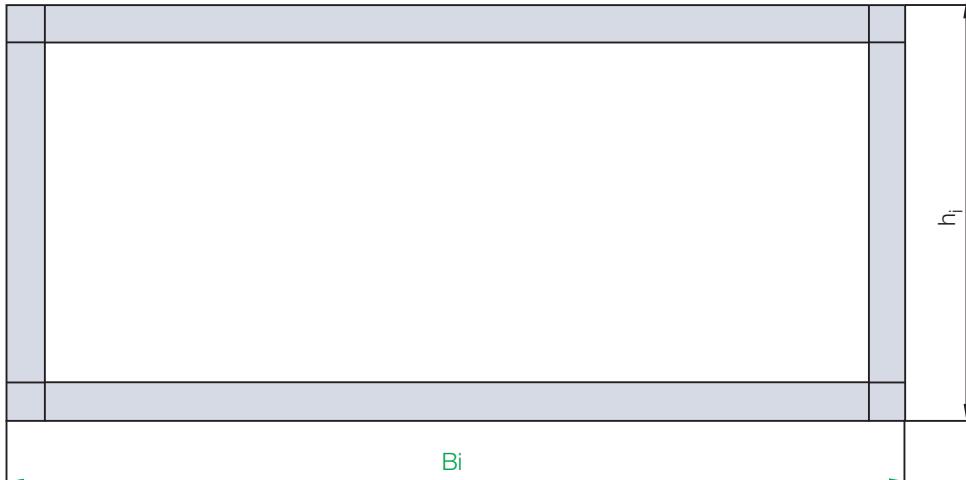

Angle of rotation in ° .....

## Cable and hose layout

Please sketch the cable and hose layout within the chain.

**Note:**

To find the correct series, refer to the thickest cable diameter, plus cable clearance of approx. 20% of the chain interior.

## TwisterChain® Series

2208  2808  3808  4008

## Existing installation space

$X_1$  max.: .....  
 $X_2$  max.: .....  
 $H_F$  max.: .....

## Chain data

Outer radius AR: .....  
 Inner radius IR: .....  
 Bending radius R: .....

## Guide trough

yes  no

## Trough part number

9 ..... - ..... - .....

## Supporting structure necessary

yes  no

The guide trough part number includes all the necessary elements for proper operation. The angle of rotation is dependent upon support for the upper run and should be assembled on-site. If on-site assembly is not possible, we will deliver a supporting structure which can be assembled on the floor and is based on the height of the lower trough run. If necessary, we will design a supporting structure specially adapted to your application.
