*Helping you build a better machine, faster.*

*Helping you build a better machine, faster.*

## Danaher Motion - Helping you build a better machine, faster

Danaher Corporation combined over 30 industry-leading brands such as Kollmorgen, Thomson, Dover, Pacific Scientific, Portescap, Neff, Seidel and Bautz to establish a customer-focused motion control manufacturing company called Danaher Motion. We offer this powerful set of integrated motion control technologies under the Danaher Motion and Thomson brand names. We are a \$1B+ global motion control leader, unique in our ability to marshal decades of application experience and technical innovation to help you build better machines, faster.

Danaher Motion defines high standards of quality, innovation and technology. We enable improved machine performance and reliability while controlling costs. Our global manufacturing footprint, rapid customization and prototyping capabilities drive quick lead times. Unmatched application experience and design expertise empowers you to commission machines faster.

Consider your options in today's market for a motion control partner. Select Danaher Motion and join a team with 6100 employees, over 60 years of application experience and 2000+ distributor locations around the globe. Danaher Motion serves industries as diverse as semiconductor, aerospace and defense, electric vehicle systems, packaging, printing, medical and robotics. We offer an unparalleled depth and breadth of motion control product solutions through a worldwide service and support infrastructure, field service engineers and support teams available when and where you need them.

## The Danaher Business System - Building sustainable competitive advantage into your business

The Danaher Business System (DBS) was established to increase the value we bring to customers. It is a mature and successful set of tools we use daily to continually improve manufacturing operations and product development processes. DBS is based on the principles of Kaizen which continuously and aggressively eliminate waste in every aspect of our business. DBS focuses the entire organization on achieving breakthrough results that create competitive advantages in quality, delivery and performance – advantages that are passed on to you. Through these advantages Danaher Motion is able to provide you faster times to market as well as unsurpassed product selection, service, reliability and productivity.

## Introduction

## New Name, Established Brands

Danaher Motion's wide range of motion control systems and components offer customers an unprecedented choice in selecting the right solution for their particular application requirements. Our product innovations have been improving the efficiency and productivity of complex manufacturing operations for over 60 years through trusted brand names such as Dover, Kollmorgen, Pacific Scientific, Portescap and Thomson in industries as diverse as semiconductor, aerospace and defense, mobile-off-highway, packaging, medical and robotics.

Danaher Motion's growing family of leading motion control products tells only half the story. With a worldwide service and support infrastructure, our field service engineers and support teams are available when you need them. It is part of the Danaher Corporation's unrelenting focus on you, our customer. That's why more and more design engineers are turning to Danaher Motion to meet their motion control requirements.

## Danaher Motion AKM Motors and Drives- Choice Without Compromise

Our new AKM servo motors and drives from Danaher Motion give you unprecedented choice and flexibility from a wide range of standard products so you can select the best servo motor and drive combination optimized for your specifications. Now, selecting the right motion control products has never been easier. Pick from thousands of servo motor/drive combinations outlined in this catalog or go to our Web site to find the best solution for your application. Standard Danaher Motion AKM servo motors and drives offer the best of both worlds – the exact specifications of a custom solution with the faster delivery times and lower cost of a standard catalog product. For your truly unique motion control applications, work with our engineering support team to customize a solution for your machine design. Either way, standard product or customized, you choose the motion control solution that meets your exact requirements.

**Introduction**

## Continuous Improvement - It's the Danaher Motion Way

At Danaher Motion we are passionate about continually improving our operations to bring increasing value to our customers. The Danaher Business System (DBS) helps us improve the efficiency of our manufacturing and product development processes. DBS is a team-based approach based on the principles of Kaizen that lets us continuously and aggressively eliminate waste in every aspect of our business operations. The DBS focuses our entire organization on achieving breakthrough results that create competitive advantage in quality, delivery and performance - advantages that we pass on to you, our customer.

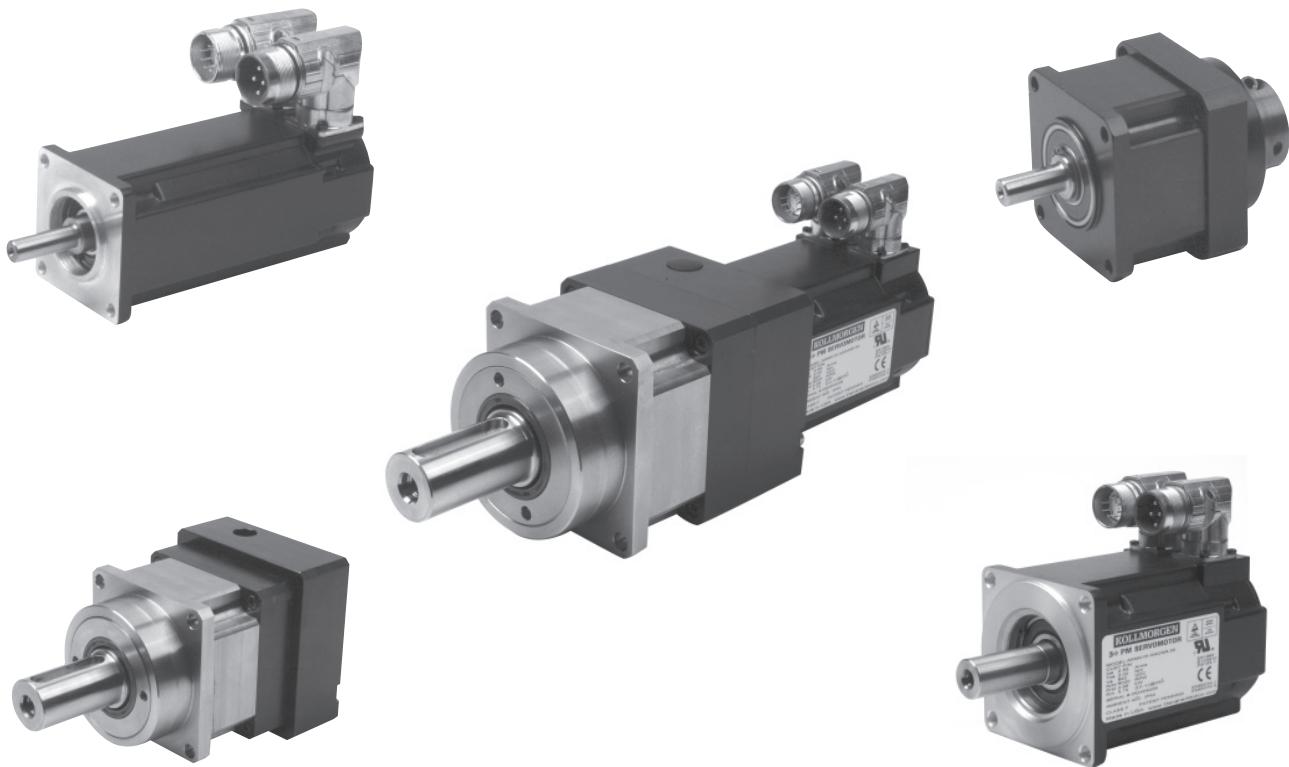

Whatever your motion control requirements may be, Danaher Motion has a solution that is right for you. Our unsurpassed product selection and service means faster time to market, higher reliability and increased productivity. Let the experts at Danaher Motion put a world of motion control solutions at your fingertips.

## AKM Gearmotors

# AKM Gearmotors, the new standard in performance, reliability and convenience.

Combining the industry-leading torque density from AKM servomotors with the proven performance of Micron TRUE planetary gearheads produces a single factory integrated solution. Built for high torque applications, AKM gearmotors offer the precision and performance required by the most demanding motion control environments.

- Easy selection of factory tested combinations, no matching of motor and gearhead required
- Single unit design for quick delivery of ready-to-mount system units
- Factory integrated and tested design eliminates assembly errors
- Save assembly time and get machines up and running faster
- Gain valuable machine space with the highest torque density gearmotors available

## Motion Control Applications

- Converting
- Printing
- Semi-conductor wafer fabrication
- Coating and film processing
- High speed electronic assembly
- Injection Molding
- Packaging
- Pedestal azimuth and elevation

**AKM Gearmotors**

## AKM Gearmotors

For high-torque applications, Danaher Motion's performance gearmotor solutions offer incredible value. AKM servomotors attached to Micron TRUE Planetary gearheads create the industry leading system that sets the standard for torque value and performance.

### AKM Series Brushless Gearmotor

**World Class Performance delivered**

Typical Issues	AKM Gearmotor Solution
Project planning and multiple lead times	Let Danaher Motion solve your system needs within the standard lead-time of the motor. One system solution with one lead-time.
Single source your system solution	Danaher Motion provides a breadth of gearmotor systems with one Part Number to order and maintain.
High demand applications with torque limiting systems' speed performance	AKM's broad torque band allows higher speeds to be realized while providing precision speed regulation at the gearmotor output shaft.
Design of mounting / alignment hardware	AKM gearmotors offer one component to mount without the need for managing adapters between the motor and gearbox.
Imperfect alignment of gearbox and motor causes reduced performance and premature failure	Danaher Motion's AKM gearmotor eliminates alignment issues by combining, testing and qualifying each system at the factory.
Compliance in motor mounting to the load	AKM servomotors feature high motor-dynamics that are optimized through the torsional stiffness of the Micron TRUE gearhead.
Servo tuning difficulty due to backlash and compliance of gearbox	Micron TRUE planetary gearheads offer industry-leading accuracy (low backlash).
Increased backlash due to wearing gears	Micron TRUE planetary gearheads offer 100% load sharing over the hardened gears.
Motor bearing failure due to radial loading	Micron TRUE planetary gearheads resultant force on motor bearing is zero!
Gearbox lubrication and maintenance	Micron TRUE gearheads are designed to self-lubricate.

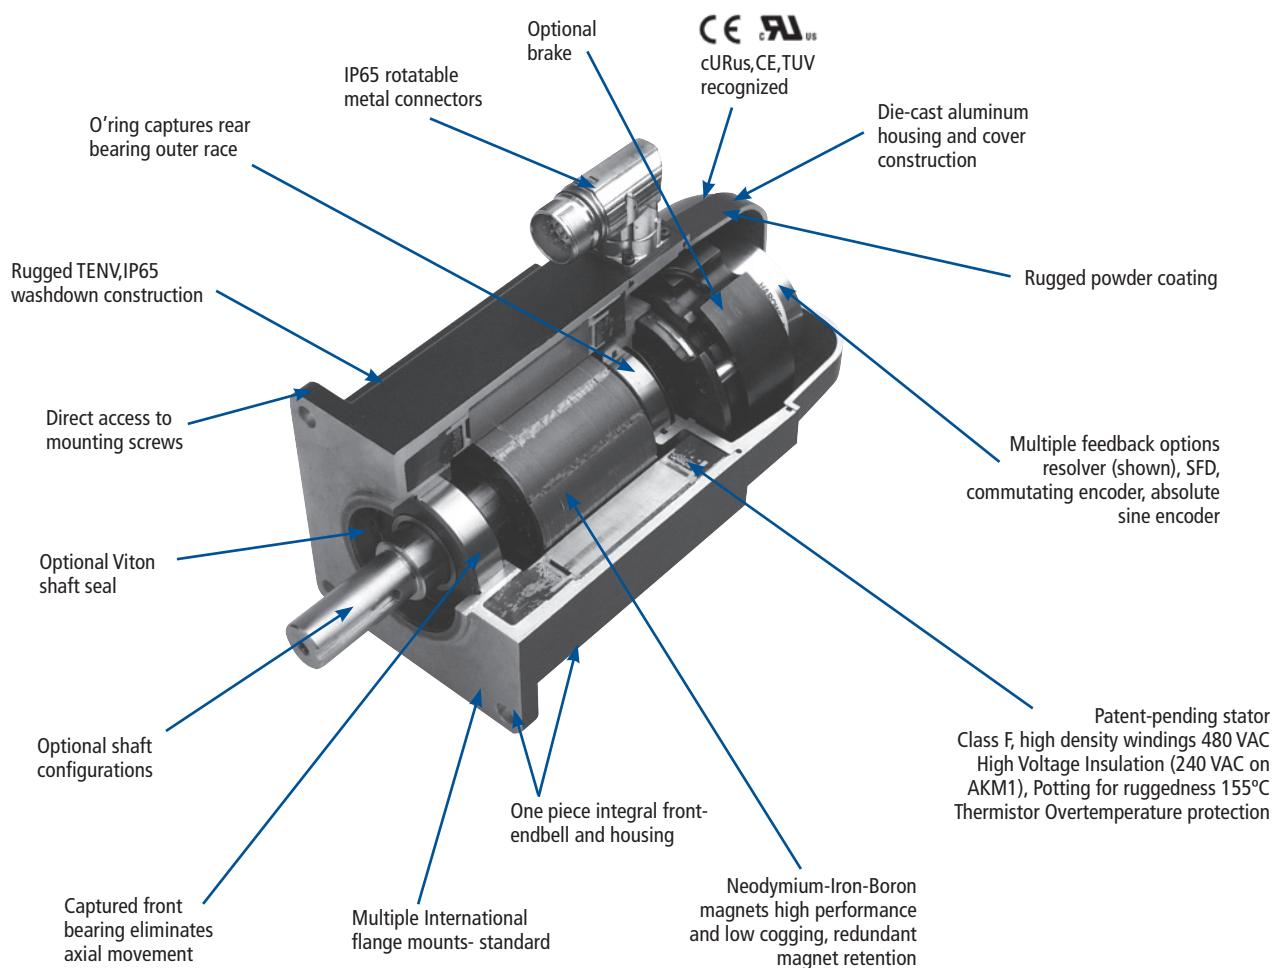

## AKM Brushless Servomotors

### Danaher Motion AKM Brushless Servomotors

The Danaher Motion AKM servomotors provide an unprecedented choice and flexibility from a wide range of standard products so you can select the best servo motor optimized for your application requirements. AKM servomotors offer the best of both worlds – the exact specifications of a custom solution with the faster delivery times and lower cost of a standard catalog product.

#### AKM Brushless Servomotors

- Best in class torque density with wide variety of stack/frame combinations
- Gearmotors available in 19 different frame/stack combinations
- Low-cog, low-harmonic distortion electro magnetic design
- More than 14 feedback variations of: resolver, SFD, commutating encoder, absolute sine encoders (single-turn and multi-turn) in the standard offering
- Single piece flow manufacturing providing faster delivery times on any arrangement of options
- Optional Teflon shaft seal (Motor Only)

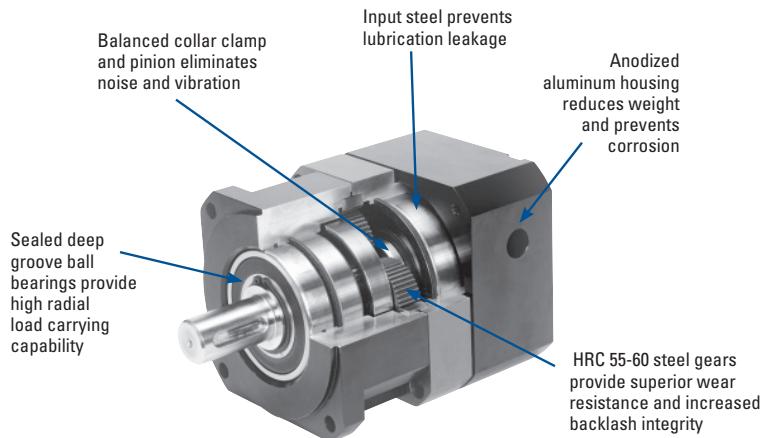

**Danaher Motion Gearhead****Danaher Motion Gearhead**

Danaher Motion offers the largest selection of TRUE planetary gearheads in the world. The gearmotor product line includes both the NemaTRUE and the ValueTRUE gearheads, ranging in frame size from 60 mm to 142 mm and ratios from 3:1 to 25:1. Danaher Motion's Helical Crowned TRUE Planetary design is industry leading in smoothness, torque and precision.

**Standard Line featuring NemaTRUE Gearheads**

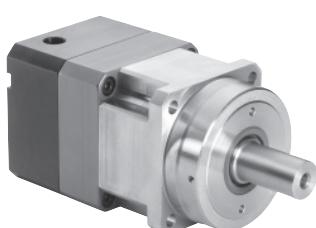

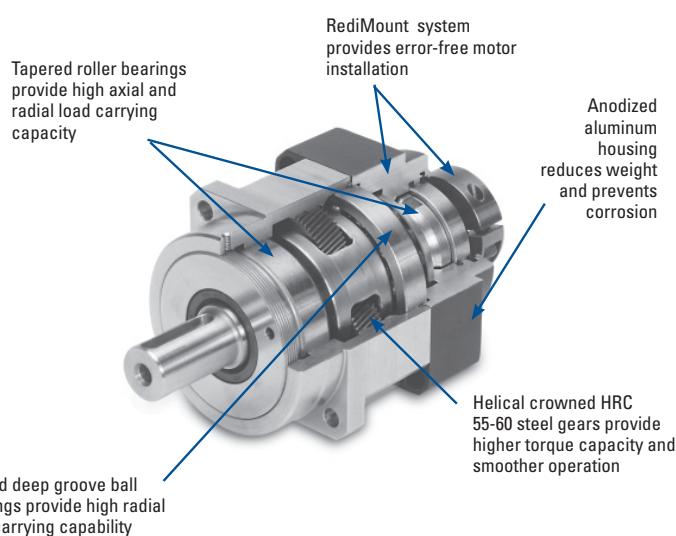

The new Standard Line AKM Gearmotor sets the standard in torque per dollar and performance. Offered in ratios from 3:1 to 25:1, the Standard Line features the NemaTRUE planetary gearhead with its high precision 13 arc minutes of backlash.

- True Planetary Gearing Design
- Standard with Micron's RediMount system
- 4 Available Frame Sizes
- High Precision: 13 arc-min of backlash
- High Torque Capacity: Up to 5860 lb-in
- High Radial Load Capacity: Up to 2000 lb
- Ratio Availability: 3:1 to 25:1

**Precision Line featuring ValueTRUE Gearheads**

The new Precision Line AKM Gearmotor raises the bar in performance and precision. For your most demanding applications, the Precision Line features the ValueTRUE planetary gearhead with its ultra-high precision 4 arc minutes of backlash.

- Helical Crowned True Planetary Gearing
- Standard with Micron's RediMount system
- 4 Available Frame Sizes
- Ultra Precision: 4 arc-min of backlash
- High Torque Capacity: 8280 lb-in
- High Radial Load Capacity: Up to 10,000 lb
- Ratio Availability: 4:1 to 25:1

## Overview - Standard Line

# Standard Line

### Specifications

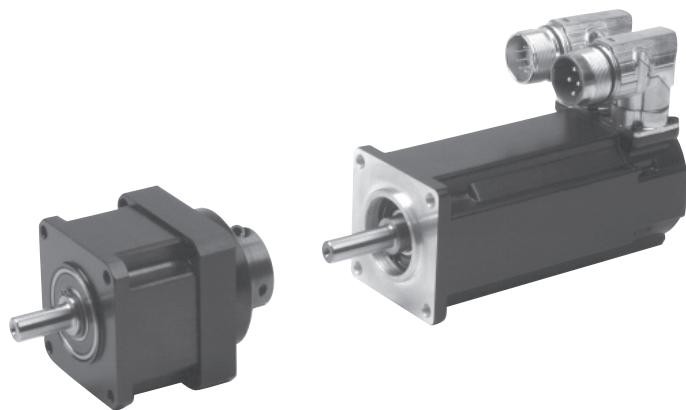

- Up to 662 Nm of peak torque
- 13 arc-min of backlash (1 stage)
- 15 arc-min of backlash (2 stage)

### Value

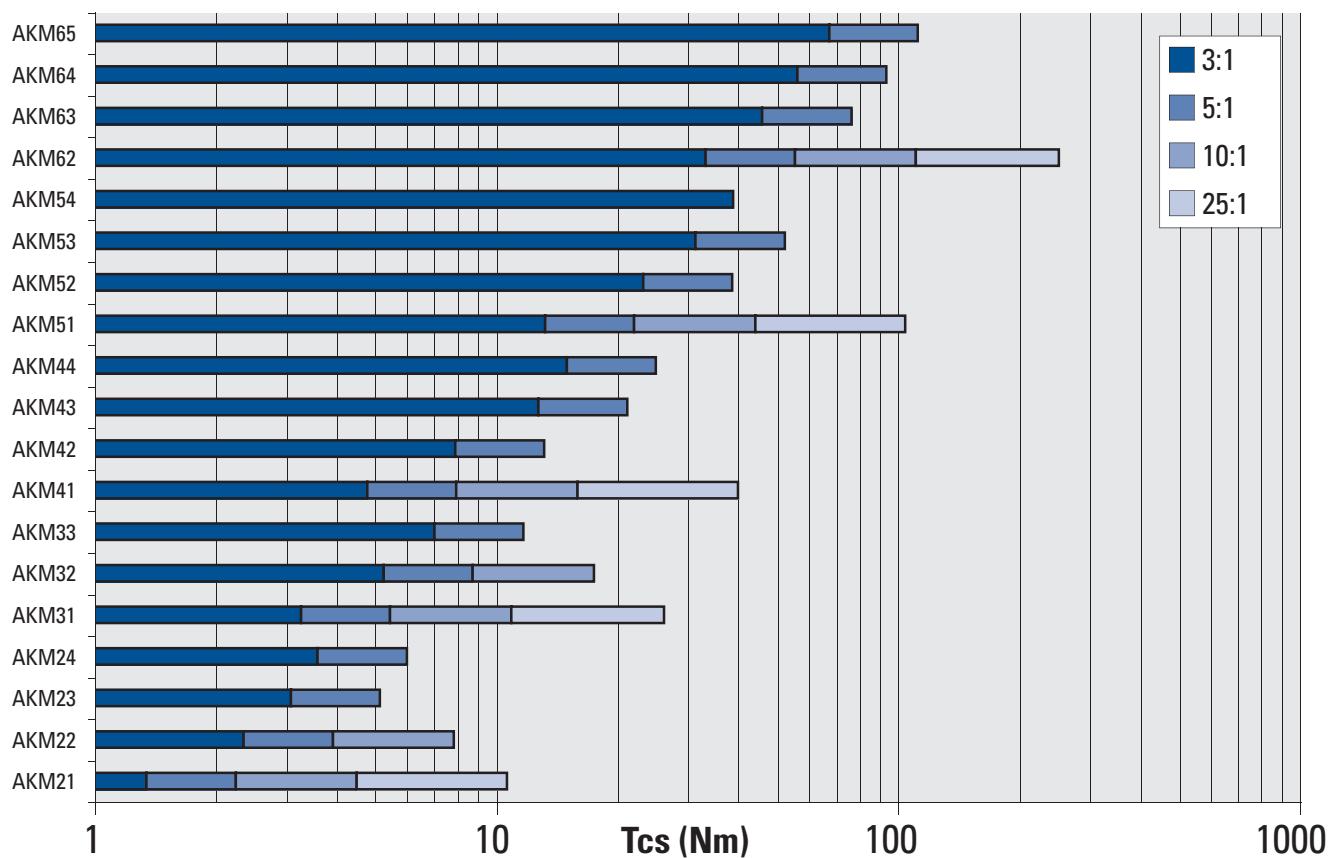

- Reliable performance at a competitive price point
- No additional price adder for assembly of components

### All the benefits of a gearmotor system at an economical price

- Inertia matching for large load inertias
- Torque increases through speed reduction
- “Lubed For Life” gearbox without leaking or messy maintenance

### Standard Line Continuous Torque

## Notes

**MOTIONEERING® - System Sizing Software**

Optimally sizing your system is a complex process. At Danaher Motion, we've built our reputation by helping customers elegantly solve challenging applications. Our engineers have spent years working closely with customers to develop this skill, and we want to put this experience to work for you. Our desire to share this experience led us to develop our innovative application sizing software, MOTIONENGINEERING, and now we're making it even better.

Danaher Motion is pleased to announce that the MOTIONEERING sizing software has been expanded. The intricacies and complexities of sizing a gearmotor have been accounted for in the software and now enable you to seamlessly integrate the new Danaher Motion AKM Gearmotor into your machine. Simply model your application in MOTIONEERING, and you'll be able to apply the optimal gearmotor solution just like a conventional servo. Your local Field Sales Engineer can help you maximize your benefit by using this tool.

At Danaher Motion, we pride ourselves on helping you build a better machine, faster. MOTIONEERING is yet another example of how we help you win every day.

Get it today at: [www.danahermotion.com/design\\_tools/](http://www.danahermotion.com/design_tools/)

## Overview - Precision Line

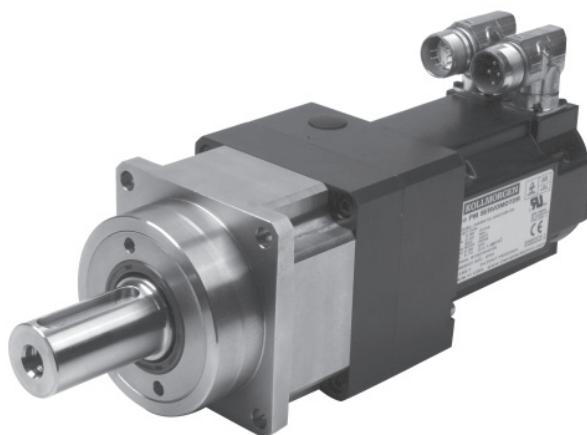

# Precision Line

# MOTIONEERING® - System Sizing Software

Optimally sizing your system is a complex process. At Danaher Motion, we've built our reputation by helping customers elegantly solve challenging applications. Our engineers have spent years working closely with customers to develop this skill, and we want to put this experience to work for you. Our desire to share this experience led us to develop our innovative application sizing software, MOTIONENGINEERING, and now we're making it even better.

Danaher Motion is pleased to announce that the MOTIONEERING sizing software has been expanded. The intricacies and complexities of sizing a gearmotor have been accounted for in the software and now enable you to seamlessly integrate the new Danaher Motion AKM Gearmotor into your machine. Simply model your application in MOTIONEERING, and you'll be able to apply the optimal gearmotor solution just like a conventional servo. Your local Field Sales Engineer can help you maximize your benefit by using this tool.

At Danaher Motion, we pride ourselves on helping you build a better machine, faster. MOTIONEERING is yet another example of how we help you win every day.

Get it today at: [www.danahermotion.com/design\\_tools/](http://www.danahermotion.com/design_tools/)

## Compatible Drive Products

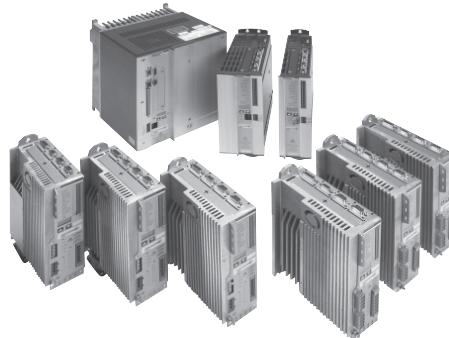

### S200 Series

The S200 is the next generation micro servo drive from Danaher Motion. This compact, high performance drive family supports torque or velocity control in the base configuration. An option card is available to provide position loop closure with indexing, CANopen or DeviceNet support. It is available in AC and DC powered versions and mates with the new AKM servomotors series, which features a smart feedback device that in conjunction with the drive provides auto set-up and tuning which reduces installation time and cost, as well as startup time when the motor or drive is replaced.

#### Features

- Highest performance all digital servo in the industry
- Easy set up and tuning with Smart Feedback Device
- Optimized performance with AKM motors
- Fully Protected
- Rugged optically isolated I/O
- Meets CE and UL Requirements
- Full Digital Design
- Very compact footprint
- Choice of motor feedback options
- Torque and Velocity control standard
- Optional CANopen or DeviceNet Position Control
- Optional CANopen Support

### S300 and S600 Series Drives

The S300 series is Danaher Motion's full feature, compact drive for 3-10 amp continuous applications. Utilizing the same design features as the established S600 family it offers users all the performance and compatibility of the larger S600 series in a smaller package and is available for 120 VAC and single phase input power applications.

The S600 series is a high performance, high power drive incorporating advanced features for three phase input applications on 208-480 VAC power systems. Available in 3 to 70 amp continuous ratings it provides coverage for a wide range of motors.

Both the S300 and S600 support the new AKM series servomotors as well as the GOLDLINE® DDR and PLATINUM® DDL series. The S600 also supports the GOLDLINE® XT and GOLDLINE® BH series of motors to meet the widest range of requirements.

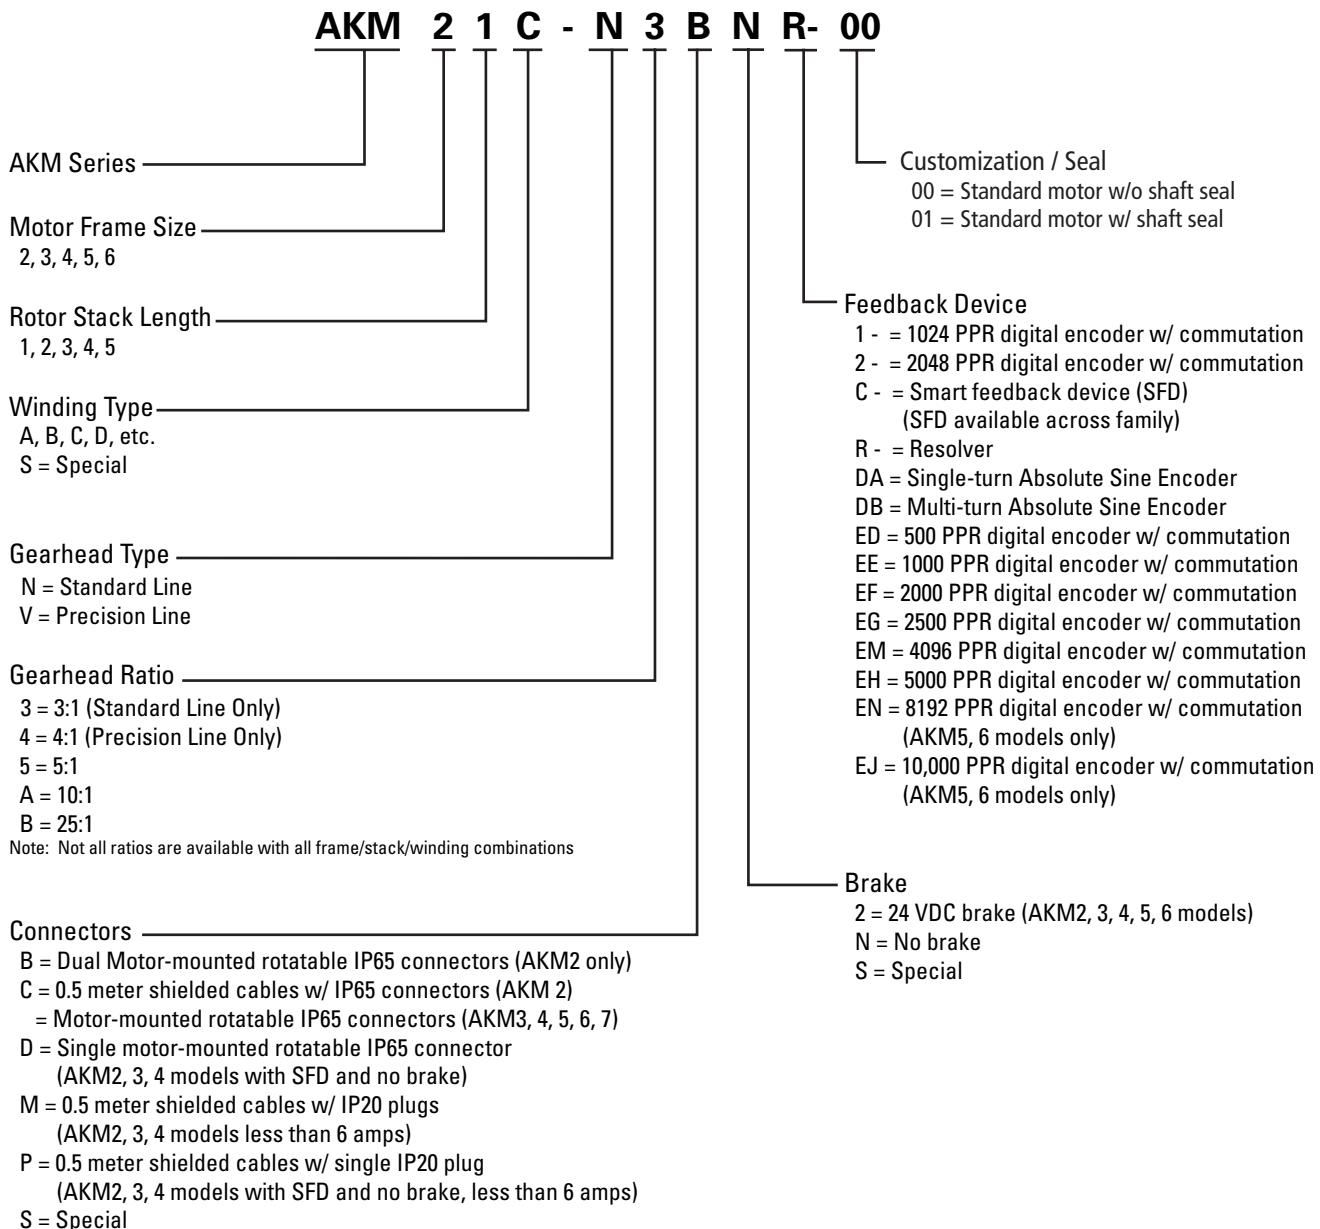

All S300 and S600 drives support plug-in option cards for I/O expansion, DeviceNet, PROFIBUS, SERCOS and Single Axis Controller capability.

#### Features

- Fully Protected
- Meets CE and UL Requirements
- Full Digital Design
- Small footprint with built-in CE filters standard for 3-20 amp units
- Choice of motor feedback options
- Torque, Velocity and Position Control standard
- Optional DeviceNet, Profibus, SERCOS
- Optional Single-axis controller
- Standard built-in CANopen Support
- Motion Tasking tied to I/O support polling
- Advanced Setup software and onboard display with keypad
