

# Dynaserv G3

## Digital Servo Drive for Direct-Drive Motors

The Dynaserv is a family of direct-drive servo systems for industrial and high-tech applications. Direct-drive systems are integrated positioning systems that allow the elimination of mechanical transmissions and allow the load to be mounted directly to the motor. This creates an extremely high-performance system that can simplify and increase the performance of many machine types. The Dynaserv G3 is the latest generation drive of the Dynaserv family and provides optimal control of a direct-drive system.

The G3 is an all-new digital drive with implementation of the advanced control and filtering algorithms needed to control a direct-drive motor. The G3 can operate in torque, velocity, or position control modes. The G3 comes with a modern Windows-based software utility that makes the set-up of the Dynaserv system easy and fast via RS232 or RS485 communication. When operated in position mode, the Dynaserv has an auto-tune utility that allows quick and easy setting of the tuning parameters. Digital implementation of the low pass and notch filtering makes mechanical resonance abatement far easier than in earlier models.

Simple motion control functions can be obtained without an external controller. The G3 contains a motion table that allows the storage of indexing moves that can be initiated through a serial command or commanded via discrete inputs. When used with a PLC using multiple inputs, the G3 can be used to achieve high-performance motion and handle complex tasks.

The Dynaserv is UL recognized and meets the requirements for CE certification. The G3 has additional innovative safety features such as a controlled stop after power failure and a servo disable switch on the front panel of the drive. Since the Dynaserv motor is capable of handling very large loads, the G3 has special circuitry to monitor power regeneration to the drive.

The G3 is a very flexible design allowing operation of the all the DM series motor models and the standard DR series motors. The G3 is also compatible with the Linearserv linear motor system.

### Features Performance

- High resolution – up to 4,096,000 pulses/rev, four times the resolution of previous model
- Advanced control and filtering designed for direct drive
- Low pass, notch and velocity loop filters
- Small footprint

### Safety and Standard

- Reduction of unexpected move at power failure
- Regeneration power monitoring
- UL, CE
- Servo disable switch on front panel

### Operation

- Operation display panel (optional) for diagnostic information and parameter changes
- Windows utility software

### Easy to Use

- Operates in position, velocity or torque modes
- Auto-tuning function
- Built-in index move capability
- User-configurable I/O
- RS232C/485 interface
- Screwless terminal strip connections
- Error/alarm history log
- Motorless operation for easy set-up and configuration of the drive

## Specifications

	500W Class	2kW Class
<b>Power</b>		
Power Supply	100~115VAC / 200~230VAC +10%/-15%	50 / 60 Hz single phase
Control	100~115VAC / 200~230VAC +10%/-15%	50 / 60 Hz single phase
Max. Consumption	1.3kVA	3.4kVA
<b>Environment</b>		
Temperature	0~ +50 (operation) / -20~ +85 (storage)	
Humidity	20~90%RH no condensing (operation and storage)	
Atmosphere	No corrosive gases, dust-free atmosphere. Do not operate in locations exceeding 1000 m above sea level	
<b>Construction</b>		
Installation		
Fan	NA	Panel mount
Regen. Resistor	External	Built-in DC fan Built-in
<b>Ext. Dimensions</b>	60 W x 195 H x 150 D (mm)	100 W x 195 H x 200 D (mm)
<b>Weight</b>	1.2kg	2.5kg
<b>Conformed Stand.</b>	Low voltage (declaration)	EN50178 (declaration) EN55011 class A group 1, EN61800-3
<b>Resistance &amp; Pressure</b>		
	Insulation resistance: 10 M Ω or more (DC500V)	
	Insulation pressure: 1500VAC 1 min	
<b>Encoder Resolution</b>	Dynaserv DMG31XXXA: 4,096,000 pulse/rev (1,024,000 pulse/rev) DMG31XXXB: 2,621,440 pulse/rev (655,360 pulse/rev) DMG31XXXC: 2,621,440 pulse/rev (655,360 pulse/rev) DRG31XXXA: 1,638,400 pulse/rev (819,200 pulse/rev) DRG31XXXB: 1,015,808 pulse/rev (507,904 pulse/rev) DRG31XXXE: 1,228,800 pulse/rev (614,400 pulse/rev) DRG35XXXB: 557,056 pulse/rev (278,528 pulse/rev) DRG35XXXC: 425,984 pulse/rev (212,992 pulse/rev)	
<b>Serial Interface</b>	Communication Communication speed Multi-channel (RS485)	Start-stop system, binary communication 38,400bps Maximum 10 channels
<b>Controller Interface</b>	Pos. command pulse (input) 5V TTL Pos. monitor pulse (output) 5V TTL Contact I/O Analog input ±10 or ± 6	[PLS-SIGN (STEP-DIR)], [UP-DOWN], [A-B encoder] [UP-DOWN], [A-B encoder] 5V TTL 12 for input, 6 for output (with user-configurable function) 5V (12V to 24V as custom) Velocity, Torque/thrust command Torque/thrust limit, torque/thrust feed forward
<b>Mechanical Input Signal</b>	Home sensor, end or travel (EOT)	
<b>Control Section</b>	I-PD control, PID control Proportional control, PID control Position, velocity and acceleration Velocity command, velocity feedback, phase delay compensation and notch (2ch) filters	
<b>Operation Functions</b>	Homing, test, auto-tuning, positioning and jog move functions	
<b>Protection Functions</b>	Encoder error, over voltage, over current, low bus line power voltage, power failure, over load, Regen. error detection, over speed, excessive pos.deviation, hardware EOT and software EOT (for linear coordinate)	
<b>Monitor</b>	Velocity, current instruction, analog (2ch) and digital (2ch)	
<b>Operation/Display</b>	Operation display panel (optional) Operation display pendant (optional) Utility software	
<b>Miscellaneous</b>	Servo deceleration function at power failure (immediate stop) Dynamic brake (as custom)

## External Dimensions (mm)

## 500W Class

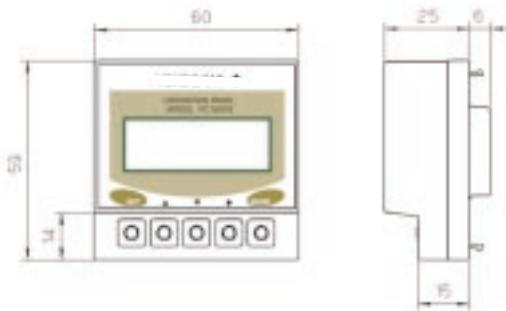

## 2kW Class

## Operation Display Panel (Optional)

## G3-Panel

This optional display panel offers the ability to display and set various parameters, and display alarms. Connect to CN1 on the drive

Connectors & Terminals		Number	Item	Connector Part Number	Description	Remark
<b>Power Section</b>						
TB1	Power supply terminal		Connector: 231-204/026-000 (WAGO)		For main & control power supply	Standard
TB2	Motor terminal		Connector: 231-203/026-000 (WAGO)		For motor power cable	Standard
TB3	Regen. resistance terminal		Connector: 231-202/026-000 (WAGO)		For regeneration resistor	Standard
GND	GND terminal		M4 solderless terminal		Protection ground	
<b>Control Section</b>						
TB4	Sensor terminal		Connector: 733-106 (WAGO)		For home sensor ± EOT	Standard
CN1	Serial interface connector (RS232C/485)		Connector: DA-15PF-N (Hirose) Cover: DA-C8-J10-F4-1		For operation display panel, operation display pendant & PC	Optional
CN2	Encoder/resolver connector (RS232C/485)		Connector: PCR-S20F (Honda) Cover: PCR-LS20LA1		For encoder and resolver cable	Optional
CN3	Analog monitor connector		Monitor card G3-R7041WC		For monitors & oscilloscope	Optional
CN4	Controller interface connector		Connector: PCR-S36FS (Honda) Cover: PCR-LS36LA		For connection to PLC	Optional

**TB1: Power Supply Terminal**

Pin No.	Signal	Definition
1	LINE (CONT) L	AC input for control circuit
2	LINE (CONT) N	AC input for control circuit
3	LINE (MAIN) L	AC input for main power
4	LINE (MAIN) N	AC input for main power

**TB2: Motor Terminal****TB2: Motor Terminal**

Pin No.	Signal	Definition
1	VA	Output of phase A of motor
2	VB	Output of phase B of motor
3	VC	Output of phase C of motor

36	ACMD_IN-	Analog command input
Shield		Shield treatment terminal

**CN3: Analog Monitor Connector**

Pin	Signal	Definition
1	VEL	Velocity monitor terminal
2	AMON1	Analog monitor terminal 1 (general purpose monitor)
3	AMON2	Analog monitor terminal 2 (general purpose monitor)
4	DMON1	Digital monitor terminal 1 (general purpose monitor)
5	DMON2	Digital monitor terminal 2 (general purpose monitor)
6	TR	Current command
7	TT	Reserved
8	T6	Reserved
9	<prohibited>	Reserved – do not connect any line
10	GND	GND terminal for monitor

## How to Order Dynaserv G3

Accessories	
Part Number	Description
G3-Panel	Display panel
71-025183-06	Comm cable
71-023715-XX	ACR to G3
71-023716-XX	6K to G3
G3-R7041WC	Analog monitor board
71-025063-XX	6K to G3 with leads for drive I/O
